AP-100AH/BR-100AH Firmware Update Procedure

This document describes how to update the firmware of AP-100AH/BR-100AH.

1. Start AMC Manager®, select the device you want to update the firmware from the device list and click the icon from the toolbar. The firmware update window is displayed.

2. Click **Browse**, select **Firmware(*.zip)** from the pull-down menu on the right of **File name** field and specify the downloaded firmware (APBR-100_xxx.zip file).
   * "xxx" of the file name "APBR-100_xxx.zip" indicates the firmware version.

3. The file information of the selected firmware is displayed. Check the file information, check the check box at **Restart the device after the update** and click **Update Now**.

4. In the password entry screen, enter the password of the device and click **OK**. (This screen is not displayed when the password is not configured to the device.)

5. The firmware of the selected device has been updated.
   Click **Close** to close the **Firmware Update** window.

NOTE:
Do not turn off the AP-100AH/BR-100AH module while the firmware update is in progress.

6. In the main window of the AMC Manager®, check that the version information is changed for the device you have updated the firmware.
