AkitaBox

Improving Operational Efficiency

with AkitaBox

Since humans have used schools, there has been someone in a toga maintaining them. We've come a long way since work orders were written in cuneiform on clay tablets but some things have stayed the same - facility teams are overworked, understaffed, and overwhelmed.

Based on AkitaBox's 2021 State of Facility Management Report*, facility management professionals reported:

72% Spend **2 hours or more per week** searching for information to do their job*

44% Take **4 or more months** to fully onboard a new technician*

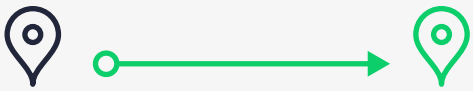
56% Agreed that their teams were **more reactive** than proactive*

AkitaBox helps unburden customers from the time consuming day-to-day tasks so they can focus their resources on their mission-critical goals.

Buckeye Elementary Schools, AZ

AkitaBox allows new hires to start servicing equipment **day 1**

La Crosse School District, WI



Vital asset and equipment information **found in seconds** not hours

University of Kansas Memorial Union

Currently completing fire extinguisher inspections **50% faster**

Tomorrow River Schools, WI

The Director of Facilities has gotten **5 extra hours back** in his work week

(That's **260 hours** per year)

With these now free hours, customers have been able to focus their in-house resources and headcount on mission-critical projects such as:

- Deferred Maintenance
- Preventive Maintenance
- Sustainability Projects
- KPI Analysis & Reporting
- Long-term Facility Planning
- Staff Development & Training

Easy-to-use and intuitive facility management software.
Doesn't that sound nice?

Want to see AkitaBox in action? See all AkitaBox Essentials has to offer including:
