Leave Your Citrix Infrastructure To Us

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered by: CITRIX®

Infrastructure Monitoring

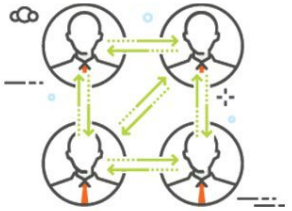
Monitoring plays a vital role in maintaining a healthy, reliable IT environment, but it can distract you from strategic projects. Our team sets and fine-tunes thresholds, configures alerts, and provides 24/7 automated monitoring of Citrix infrastructure components, from licenses to servers.

User Expansion

Obtaining full value from a new Citrix solution requires timely rollout to your user base. Managed services accelerates the onboarding of your new users. Our services include supporting your rollout plan, identifying user groups and workflows, configuring the Citrix environment, adding users to groups, onboarding and providing automated monitoring.

Infrastructure Management

To optimize system uptime, we work proactively to make sure patches and upgrades are handled promptly and smoothly. We also work proactively to address pain points. Monitoring and alerting minimizes the impact of unforeseen issues.



Infrastructure Stabilization

We bring your Citrix environment to a steady state without disruptions. Our team works behind the scenes to stabilize your infrastructure by targeting and fixing a defined set of issues. Our services include an environment assessment, root cause analysis, as well as change, release and configuration management. We also provide proactive monitoring and a service desk to manage, track and address stabilization items.

Successful Citrix Deployment in 4 simple steps

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

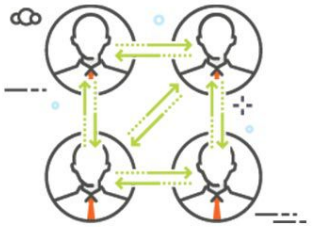
Powered by: CITRIX®

Design

We start by understanding your existng IT model, then propose a soluton that meets all your business needs.

Build

We build and confgure the soluton, then release for user acceptance testng and sign off.



Migrate

With the correct design, we move onto planning and supporting your migration.

Manage

Our friendly support desk offers comprehensive 24/7 monitoring and alerting of your desktop and applications.

XcellOffice

Solving Every Day Citrix Issues

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

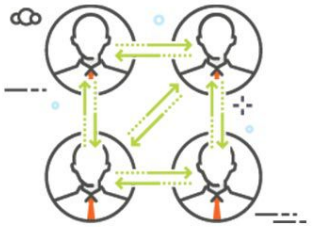
Powered by: CITRIX®

Infrastructure Upgrade

Clients who need to upgrade their infrastructure will often face complex challenges getting Citrix running as intended. The application must be supported by an extremely stable backend in order to work.

Poor End User Experience

An unsatisfying Citrix experience can stem from many factors external to the app itself. Issues with Citrix can often be traced to SQL, mass storage, Active Directory, and more.



Lack of Manpower

IT departments are often stretched thin. Our clients often find themselves without a team large enough to support a Citrix deployment, or with a team that has no native Citrix experience.

Incomplete Features

Commensurate with a lack of manpower, both large and small companies have difficulties realizing the full Citrix feature-set. Small companies can't afford to train their staff on every feature, whereas large companies may simply overlook the issue.

Complex Incident Resolution

Teams often face technical challenges with Citrix due to infrastructure issues, or personnel challenges due to siloed IT departments. No matter the reason, it can be frustrating to find the source of problems amidst a thicket of potential causes.

Citrix Overload

Companies running multiple Citrix servers or many Citrix images will often have implementations that are slow or buggy. This stems from configuration differences between servers, or simply from having an unmanageable number of VMs.

USE CASES

Protect your online identity

With Xcellhost, you can protect yourself from data theft, tracking, surveillance, and commercial targeting.

Block ads, trackers & malware

The web is better when you're safe. Forget malware & phishing attempts, and be free from ads.

Stay safe on public Wi-Fi

Public Wi-Fi can come in handy - but it's a goldmine for hackers. Use Xcellhost to protect your connection.

Be secure while online banking

Our diamond-strong end-to-end encryption & malware filters ensure safe online banking, every time.

Secure your crypto assets

Encrypt your data and avoid malware. Make sure your wallet cannot be traced and identified via your IP address.

Protect yourself while gaming

Most gamers have heard about the horrors of doxxing or even swatting. Shield yourself with Xcellhost.

Bring your entertainment abroad

There's no need to miss your favorite shows when you travel just because they're only available back home.

Bypass censorship. Everywhere

The internet should be an open hub of knowledge and sharing. With Xcellhost, you can access any content, from anywhere.

Stream live sports safely

Stream safely with Xcellhost. You won't suffer from buffering and will be able to watch your matches in HD, without annoying pop-ups.

Find the best prices online

Check the prices in different countries and score a great deal. Works like a charm with airline tickets, hotels, and car rentals.

Enjoy safe & fast torrenting

Make sure that you're private and secure when seeding or downloading P2P files. You won't get big speed drops.

Watch content privately

Stay private and secure at all times. Watch whatever you want, and don't worry about anyone watching you.

HOW WE'RE DIFFERENT

Organize

Delivers secure access to all the information, apps, and content relevant to a person's role.

Security

Helps people focus on what's most important with streamlined workflows and virtual assistance.

Choice

Leverages machine learning to automate routine tasks and reduce busywork.

Choose the plan that's right for your business

Workspace Premium

₹1371 User/Month

Complete workspace solution for workers who need a full digital workspace with granular security but don't require virtual apps and desktops.

Includes Workspace Standard functionality, plus advanced security controls for SaaS and web, unified endpoint management, and Content Collaboration Premium.

Workspace Premium Plus

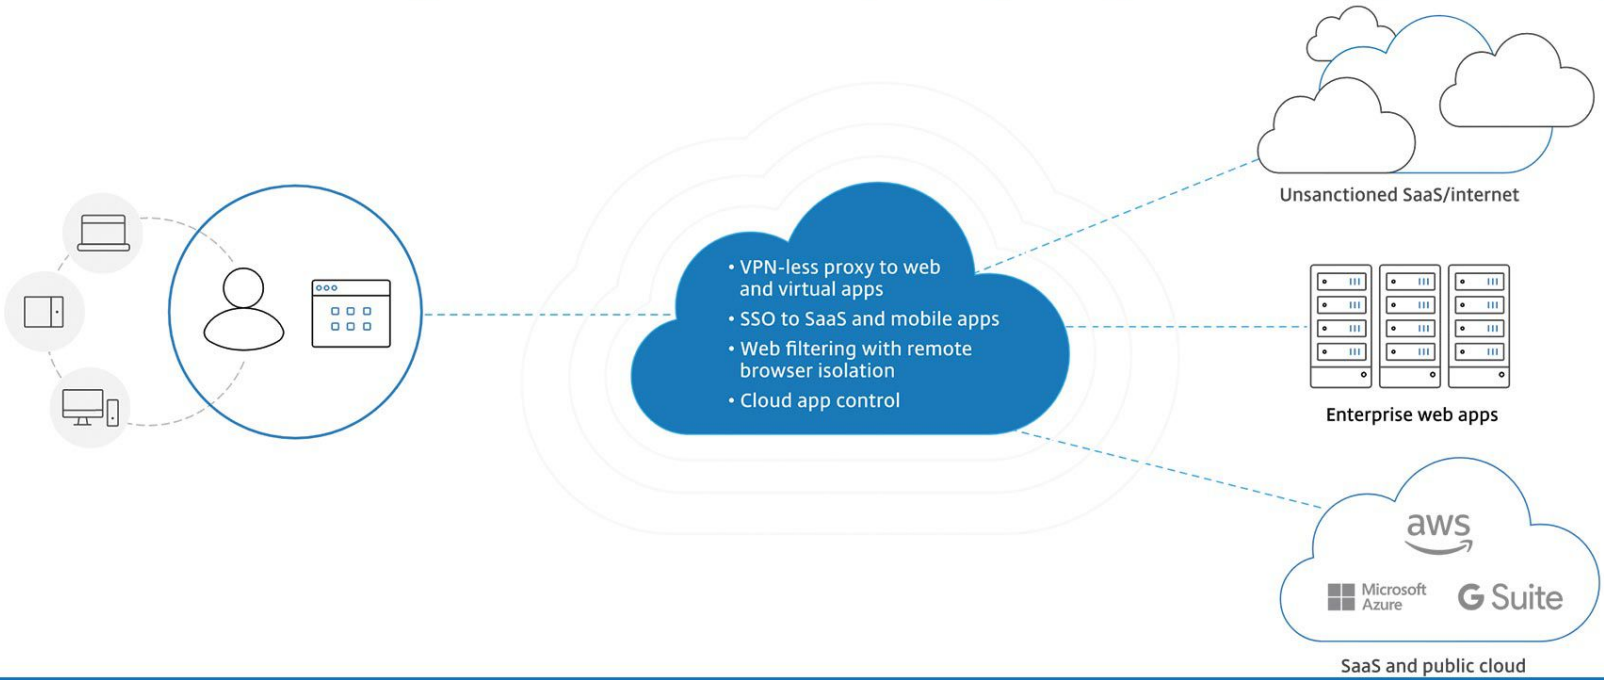
₹1904 User/Month

Comprehensive workspace solution inclusive of hybrid deployment options for Citrix Virtual Apps and Desktops.

Includes Workspace Premium functionality, plus a cloud management option for Citrix Virtual Apps and Desktops.

KEEP YOUR DATA SAFE—AND YOUR COMPANY COMPLIANT

Go beyond traditional SSO to control access to apps based on where and how they're used, providing contextual security without limiting employee productivity.



Citrix Gateway

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

Citrix Gateway

Virtualizing the power of advanced Web & Application delivery and remote access services

NetScaler VPX provides the complete NetScaler web and application load balancing, secure and remote access, acceleration, security and offload feature set in a simple, easy-to-install virtual appliance.

Key Benefits

- Reduces hardware server costs by 60%
- Accelerates application performance by 5x
- Provides consolidation of remote access
- Improves application security with centralized policy management
- Provides SSL VPN-based remote access
- Ensures high availability
- Provides monitoring of application and network traffic

Key Features

- Enable a Virtual Infrastructure
- Provide Secure Remote Access
- Leverage In-Place Processing Capacity
- Provision Infrastructure Ondemand
- Protect Infrastructure Investments
- Customize Web and Application Delivery

Secure web browsing—without limiting access. Keep your data safe from browser-based attacks.

When it comes to security, the internet is among your biggest enemies. Which is a problem, since employees need the web to stay productive.

KEY FEATURES

- Bookmarks for favorite pages
- Single sign-on & Ability to download files securely
- Ability to block pop-ups & Secure intranet access
- Bug fixes and performance enhancements
- Ability to download offline pages

Benefits

- Browse faster without ads
- Do what you want online, securely
- Prevent hackers from stealing your data
- Block malicious websites and downloads
- Automatically force websites to use encryption
- Keep your personal data personal

CHOOSE THE PLAN THAT'S RIGHT FOR YOUR BUSINESS

Stand-alone

₹229 User/Month

Citrix Secure Browser as a fully-hosted Citrix cloud service. Gives employees consistent, secure remote access to the internet and web apps while protecting the corporate network from browser-based attacks.

Workspace Premium

₹1371 User/Month

Citrix Secure Browser service integrated into Citrix Workspace, for employees who need a secure digital workspace but don't require virtual apps and desktops.

Opens web apps inside the workspace for a secure experience that doesn't require endpoint configuration. Includes web filtering of blacklisted URLs, machine learning to flag suspicious behavior, and secure file sharing on any user device.

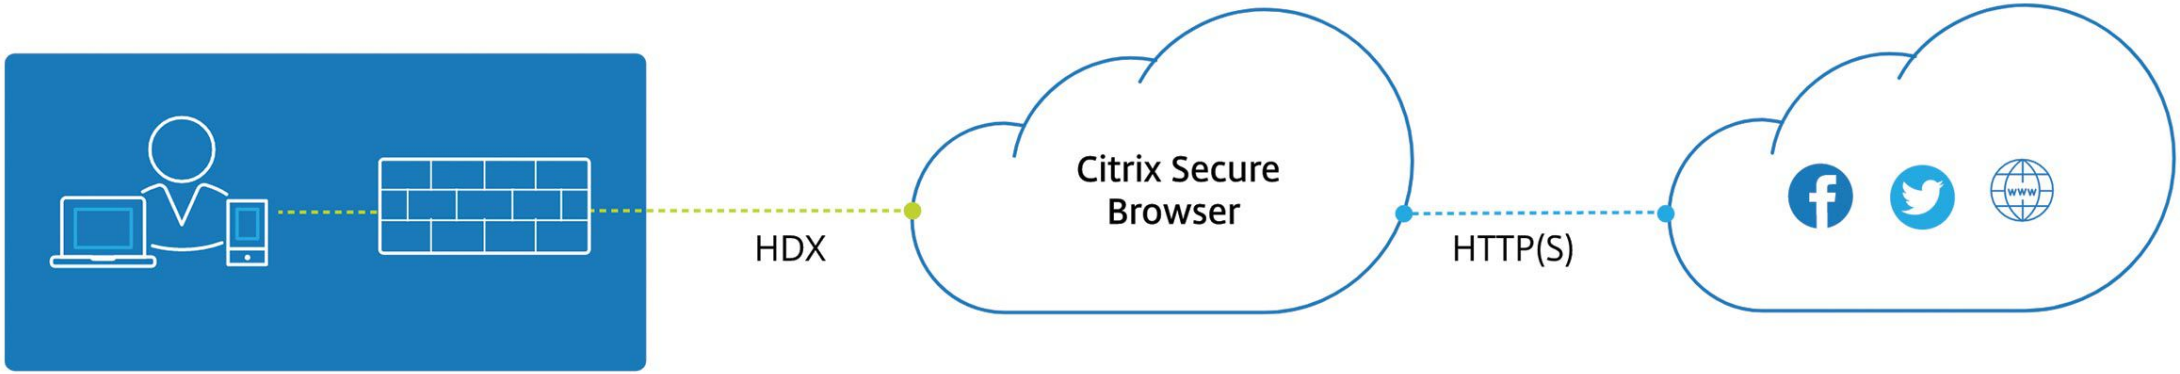
Workspace Premium Plus

₹1904 User/Month

Citrix Secure Browser service inside a comprehensive workspace solution with hybrid deployment options for Citrix Virtual Apps and Desktops.

Includes Workspace Premium functionality, plus security controls enabling admins to dynamically record user sessions or watermark content for data loss prevention.

GO AHEAD—LET EMPLOYEES BROWSE AWAY. WE'LL ISOLATE THAT TRAFFIC AND KEEP YOUR NETWORK PROTECTED.



Enterprise network

XcellNetwork

Citrix SD-WAN

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

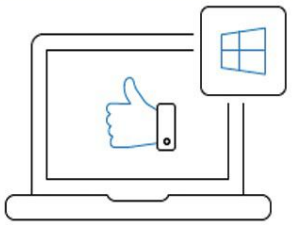
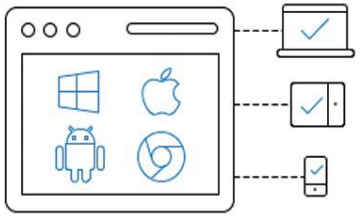
CITRIX ENDPOINT MANAGEMENT USE CASES



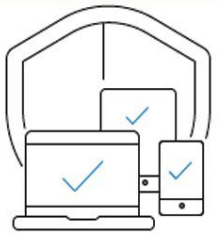
Create a workspace experience that's simple, secure and easy to manage

Secure every endpoint with a unified endpoint management solution



Simplify IT with unified endpoint management (UEM)

Manage every endpoint from the same console

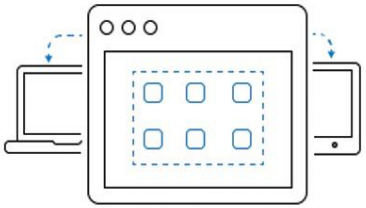


Enhance your Microsoft Endpoint Manager (formerly Intune) deployment

Reach beyond Enterprise Mobility + Security for more features and flexibility

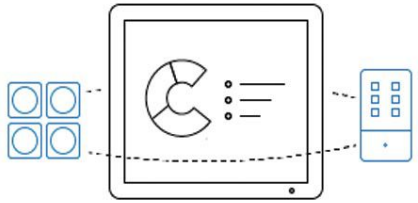
Implement a successful bring-your-own-device (BYOD) program

Let employees use personal devices with better security



Build a better workspace experience

With a unified endpoint management solution designed for security and productivity



Turn any device into a powerful business tool

Build your ideal set of productivity apps with advanced mobile security

HOW WE'RE DIFFERENT

Experience

Ensure the same seamless experience on every device, for every employee, with powerful UEM tools and secure enterprise apps.

Security

Control, containerize and enforce compliance as needed, all from the same central IT management console.

Choice

Let employees choose which devices to use—and give IT the freedom to select the best deployment methods for safe, reliable access across endpoints.

XcellOffice

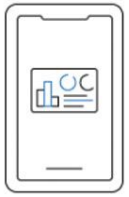
Citrix Analytics Performance

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

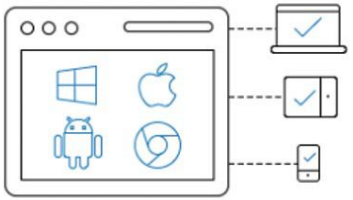
Powered By:
Citrix Analytic Performance

Real-time insights for an always-on employee experience.Find & fix performance issues from one easy-to-use dashboard.

In your always-connected workplace, the sheer volume of performance data demands more than disjointed, back end monitoring.



App Performance



Operations

Easily manage app performance for any user

Easily manage app performance for any user In order to focus on people, you need a workspace that is intelligent enough to offer up the right application performance to each user, no matter where they are or what device they're using. Intelligent analytics backed by artificial intelligence and machine learning can detect anomalies in app performance and alert IT. Instead of waiting for an unhappy user to report poor performance, you can detect the problem early and start addressing it right away.

Improve operations to support modern IT

Optimizing underlying infrastructure in support of modern hybrid cloud deployments requires sophisticated insights. In support of capacity planning, understanding true usage of resources can help optimize resources and drive costs down. Citrix Analytics for Performance applies advanced algorithms
