**A CDC ELITE Certified Laboratory**

Facility Tested: Test Site #1 Date  
of Testing: 2021/01/01 Contact  
Email: [jsmith@email.com](mailto:jsmith@email.com)

**Validation Criteria:**  
**Potable Water** - typically in well managed systems, the total viable heterotrophic aerobic bacterial concentration should be less than or equal to 10<sup>3</sup> CFU/ml. Per the OSHA *Legionella* Technical Manual, the viable *Legionella* concentration should be less than 10 CFU/ml unless the water system serves immunocompromised or higher risk users which require a more stringent level of *Legionella* control (less than 1 CFU/ml).  
**Utility Water** (such as cooling water) - typically in well managed systems, the total viable heterotrophic aerobic bacterial concentration should be less than or equal to 10<sup>4</sup> CFU/ml. For closed recirculating utility water, the total viable heterotrophic aerobic bacterial concentration should be less than or equal to 10<sup>2</sup> CFU/ml. Per the OSHA *Legionella* Technical Manual, the viable *Legionella* concentration should be less than 10 CFU/ml.  
- The facility **Water Management Team** should review all options for Validation Criteria and choose its specific criteria based on the specific systems and users.

# Phigenics Validation Test (PVT) Report Summary

Method Used: TimeZero Method

<b>Legionella Caution</b>		Indicates <i>Legionella</i> was detected.
<b>THAB Caution</b>		Indicates total heterotrophic bacteria count exceeds the validation criteria (10 <sup>3</sup> for potable, 10 <sup>4</sup> for utility, 10 <sup>3</sup> for closed recirculating utility).
<b>NO Concern</b>		Indicates results are better than the validation criteria.
		Indicates <i>Legionella</i> was not detected.

PASL Number	Date Inoculated	Date Analyzed	Collector	Location Identification	Category (Potable/Utility)	Category Detail	Total Bacteria	Lpn S1	Lpn S2-14	Legionella Spp
								CFU/mL		
10000	2021/01/01	2021/01/03	J. Smith	Sink #1 Hot	Potable		10 <sup>3</sup>	70	ND	ND
