

BerniePortal

August 2021 Release Notes

Four areas of improvement:

- 1 Have Separate BernieBills Generated for each Department or Division Within an Organization:**
 - Instead of having one bill for all employees, BerniePortal can now generate multiple BernieBill PDFs based on your individual departments
 - Employers can indicate that they want BernieBills separated out by department or division in their Account Settings
- 2 Updated BerniePortal Knowledge Base:**
 - More user-friendly Knowledge Base than what we had before
 - Ability to submit a ticket within the Knowledge Base routed directly to your BerniePortal Success Team
 - Access the Knowledge Base in your account dropdown or at the login page
- 3 Improved Employee Plans Area:**
 - This update to the Employee Plans area allows you to see all employee election information on one page
 - View not only the benefit types that the employee has elected but the actual plan name, coverage tier, effective date, and deduction amounts all in one election table
 - You can still edit employee effective dates from this area when the employee is eligible to have their effective dates adjusted
- 4 Enhanced Benefits Feature Design:**
 - See how many employees are assigned to a given Benefits Subgroup
 - Easily drag and drop to attach Summary Plan Descriptions and other Enrollment Documents that employees should see at the beginning of their enrollment
 - This update makes it easier to navigate the Benefits Settings area too
