

BerniePortal

September 2021 Release Notes

Three areas of improvement:

1 Google Workspace Integration:

- A new strategic partnership with Google allows employers to seamlessly integrate a Google Workspace account with BerniePortal.
- Create a new Google Workspace account for a new hire or an existing employee within BerniePortal.
- Assign employees to their appropriate Google Group(s) directly in BerniePortal.
- Closeout a terminated employee's Google Workspace account when terminating them in BerniePortal.

2 New Status for Declined Candidates in Applicant Tracking: Declined / Keep in Mind:

- A candidate that wasn't the right fit for the particular role they applied for may still be a desirable candidate for a different role within the organization.
- Now, when declining a candidate, you may indicate that you might consider a candidate for another position even though you are declining them at the moment.
- That candidate will now show a status of "Declined / Keep in Mind" in the Candidates List instead of just outright "Declined."

3 New Email Settings for Hiring Managers and Influencers:

- Employees who are Hiring Managers and / or Influencers can now set their email settings for when they would like to receive email notifications when a candidate applies to one of their job posts.
