

A Cyber Security Resource

Best Practice's

Each organization can help to mitigate their cyber risk:

1. Change passwords a minimum of twice a year! 13+ characters Passphrase
2. Strict Policy on not allowing work email domain name use for anything outside of work. (using for LinkedIn, Amazon, etc...)
3. Utilization of Dual Authorization and or tokenization with your bank on all financial transfers.
4. If sending electronic invoices out to your customers. Inform all customers you will NEVER change routing and or payment information electronically. It will always require a call in person to verify.
5. Phishing scenario utilization. Internal practice around spotting fake emails and how to spot them. Test scenarios to track compliance and utilization.
6. Encourage Team members to create an organization that is vigilant to "See something-Say something"
