

This guide is for **after** students have been enrolled into an existing NHA course for certification prep.

Step 1: Log into your administrative account at [NHANOW.com](https://nhanow.com)

Step 2: Under **Prep Materials** on the left-hand side and choose **Courses**

Step 3: Locate the course and select **Course Details**

Step 4: To view the study materials select the **Preview** feature to the right of any item

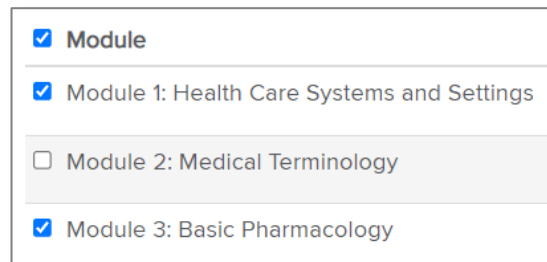

- After selecting Preview, you will see content identical to your candidate(s)

Step 5: You have options to manage candidate access to the materials:

- Deselecting the module will turn access off for your candidates
- Adding an availability date will lock access until this date. If left blank, access will default to active
- Turning off the practice assessment rationales will provide a more “real” exam experience

**Note: For best practices on timelines and rationales, please refer to the certification material Implementation Guide.*

Step 6: **Assignments** will show candidates your expectations on time spent in a module or practice assessment completion

- Assignments do not affect access to the materials

**Note: Adding an assignment for a practice test should reflect the test attempt: 1, 2, 3, etc.*
