

READY4 FOOD & BEVERAGE

A DIGITAL SOLUTION FOR THE AGRI-FOOD PRODUCTION AND DISTRIBUTION SECTOR

SOLVING CHALLENGES

The challenges faced within the food and beverage industry are complex and demanding. To help you in this dynamic market, a digital transformation will give you a better insight into your business processes to help assure optimal product quality, plan effective wholesale distribution, whilst driving sales and reducing costs.

Ready4 Food & Beverage from SOA People is an SAP certified solution designed by our experts. It gives you the tools to assist with critical functions including demand planning, supply chain management, quality management and traceability.

KEY BENEFITS

- Integrated management of all your processes, from the development of new products to distribution within new networks.
- Permanent alignment with regulatory requirements in the Food sector.
- Real time data management to improve decision making.
- Digital platform included to develop new business models and applications to serve consumers and B2B customers.

SOLUTION: READY4 FOOD & BEVERAGE CAN HELP YOU IN EVERY AREA OF YOUR BUSINESS

Production and Supply

- Management of R&D projects
- Supply management: multi-vendors, automation, contract management
- Management of sensitive and specific data including recipes, ingredients and nutritional contents
- Recipe-driven production process: formula management, yield and scrap, by product and co-product capabilities
- Maintenance planning using Production Execution Systems
- Integration of GS1 standards (GTINSSCC-GLN)
- Calculation of industrial production costs

Traceability and Quality

- Batch management and total traceability (input and output register)
- Integrated management of shelf-life expiration and best-before dates
- Integrated quality management: raw materials, process controls, finished products, certificate management, supplier evaluation, non-conformity management
- Management of product data sheets, allergens and nutritional characteristics
- Compliance with Food standards: HACCP, FDA, ANSA, AFSCA, NWA, BRC...

Distribution

- Barcode management and RF-Tags according to international standards (such as GS1, SSCC)
- Advanced Warehouse management: cross-docking, optimisation of picking paths and integrated radiofrequency scanning solution with automated warehouse systems and Voice Picking systems
- Transportation Planning: Route scheduling, transport costs, integration with road and loading optimisation tools and carriers
- Product data management: display management, supplier catalogue integration
- Planning and forecasting of demand
- Integration of EDI to meet the requirements of mass distribution
- Excise and Returnable Packaging management

Sales and Marketing

- Management of promotions and discounts, sales actions and advanced real-time pricing tools, enabling the modelling of complex data
- Multichannel sales management (web, telesales, point of sale, mobile sales, EDI)

- Active telesales for cross-selling, upselling and liquidation management
- Rebate and Point of sale management: inventory management, replenishment and integration of cash register systems
- Integration of online sales function and CRM

INTELLIGENT ENTERPRISE

SOA People will inspire your business and support your journey to becoming an Intelligent Enterprise. Applying new technology and service models together with your data assets will improve your business performance. The latest SAP technologies and user interfaces adapted to digital and mobile trends will assist your digital transformation. Ready4 Food & Beverages integration of AI, network sales, Internet of Objects and predictive analysis will allow you to respond faster to market changes, improve business processes and help you gain a competitive advantage.
