

Powerful Inventory Optimization Made Simple

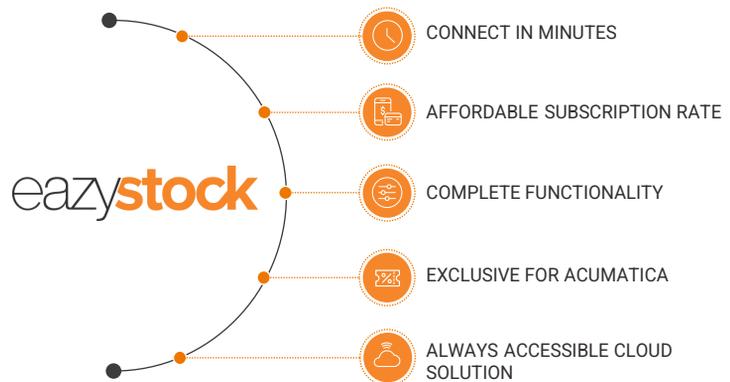

EazyStock helps Acumatica users take control of their inventory, lower operating costs and automate purchasing.

Ensure Product Availability with Minimum Inventory Investment

Product availability is critical for stock-holding businesses. It helps achieve sales targets, ensure customer satisfaction and generate great reviews. But ensuring high levels of availability without holding excess amounts of stock can be challenging. EazyStock helps businesses around the world optimize their inventory management processes, so they can meet customer demand without tying up too much capital in inventory. On average, EazyStock users report over 30% reduction in inventory and only 3 months to ROI.

EazyStock – A Product of synchron

EazyStock's tried-and-true solution is developed and owned by Synchron, a leading provider of inventory management solutions and trusted by leading global brands in 100+ countries around the world for over 20 years now. Built on Synchron's powerful platform, EazyStock is the perfect solution for SMBs looking for additional inventory management features such as seasonality, replenishment, demand trend identification and more.

"The EazyStock team has a solid understanding of how EazyStock complements Acumatica and how to help us best use their software. They listened to our challenges and suggested ways for us to improve our business processes for the quickest ROI. We highly recommend EazyStock for anyone needing more powerful inventory management for their Acumatica ERP."

- Clyde Cornelius, Director of Operations & Technology at ToolPro, Inc.

EazyStock's Offering for Acumatica

EazyStock has been an Acumatica-certified ISV since 2016. Acumatica users receive the robust features and functionalities of EazyStock's inventory optimization solution along with EazyStock's pre-built connector to Acumatica at an affordable subscription rate. Plus, like Acumatica, EazyStock is a cloud solution hosted on AWS – so it's always accessible!

EazyStock integrates with Acumatica ERP and/or MRP. EazyStock's existing connector to Acumatica includes bi-directional sync. For Acumatica ERP users, this facilitates full functionality including automated demand forecasting, recommended purchase orders, inventory redistribution suggestions, demand pattern identification and more. For manufacturers using Acumatica MRP, the connector pushes the forecast and inventory parameters back to Acumatica.

System Features

DEMAND FORECASTING

Improve the accuracy of demand projections with statistical forecasting that factors in demand profiles based on product lifecycle stages.

INVENTORY OPTIMIZATION

Dynamically classify inventory items and adjust stocking policies to meet target service levels with the lowest possible inventory costs and capital investment.

REPLENISHMENT AND ORDER FILL-UP

Automatically calculate reorder points, order quantities and safety stock levels, generating optimized order proposals that feed back to your ERP. Also meet MOQ requirements with optimized recommendations.

SUPPLIER MANAGEMENT

Automatically adjust inventory ordering to account for variable lead times, changing production schedules and ordering constraints.

MULTI-LOCATION PLANNING

Optimize the distribution of inventory items across multiple warehouse locations with a synchronized view of your warehouse network. Additionally, redistribute inventory across locations based on demand patterns.

REPORTING AND KPI'S

Stay informed about all things inventory with an up-to-date KPI and reporting dashboard. Make more informed decisions with KPIs such as service levels, inventory levels and stock turn – all available at a glance.
