

# 10 PLACES TO DISINFECT

## in Your Manufacturing Plant

Leverage data-packed  
hourly PMs to help  
keep your plant safe

Keeping high-touch objects and surfaces clean helps prevent the spread COVID-19. Remember, cleaning just removes germs. Disinfecting kills them. You need to do both.

Not sure you have the right products? The United States Environmental Protection Agency provides a [searchable list of disinfectants](#) for use against COVID-19. Always read product instructions carefully, focusing on use and surface types, contact time, and safety precautions.

Focus on high-touch objects and surfaces. For each location, pack the PM with everything technicians need to work efficiently and safely. You can build one template and reuse the parts you need.

### TOOLS & WORKSPACE SURFACES

Before and after each shift or rotation

### MOVEABLE TRAYS & CONTAINERS

At least once per shift or between users

### CONVEYOR BELTS

At least once in the morning and once in the afternoon

### TRANSPORT VEHICLES

Before and after each use, making sure to include surfaces the previous driver could have touched like the door handle, radio, and navigation screen

#### **FORKLIFTS**

Before and after each use, making sure to include surfaces the previous driver could have touched like the mirror, seat belt, and control levers

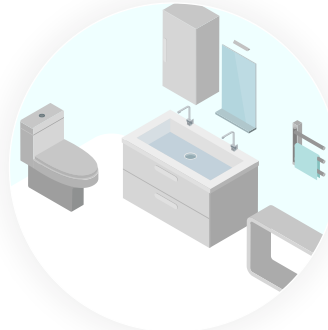

#### **FLOORS & WALLS**

Periodically where frequently touched, and mop hard surfaces once a day

#### **OFFICES, DESKS & MEETING ROOMS**

At the end of each meeting and the end of each day

#### **GENERAL SURFACES & BATHROOMS**

At least four times per day, focusing on door handles, toilet levers, sinks, paper towel dispensers, and hand dryers

#### **CAFETERIA**

Three or more times per shift, timed after all breaks and meals

#### **VENDING MACHINES**

Three or more times per shift, timed after all breaks and meals

## **Hippo CMMS helps you stay safe.**

With Hippo's cloud-based CMMS solution, you can now schedule and track a program to mitigate the risks of COVID-19 specifically. Once set up, Hippo's CMMS solution automatically generates and assigns scheduled work orders. Technicians access them directly from mobile devices, and you track the whole program with easy, automated reports.
