# A/R Leaders are leveraging technology to meet these objectives, but does implementing technology mark the end of transformation?

# Why Do 85% of A/R Transformation Projects Fail

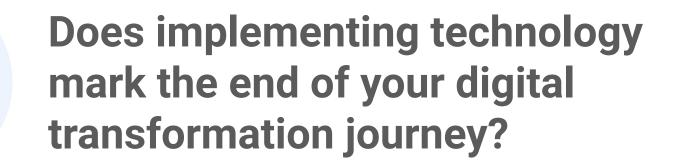

Here are the two most common mistakes that you to avoid -

### No Performance Benchmarks

If end-users don't adopt technology - you will never see the process results you expected If leaders don't define the right performance benchmarks - you can't course-correct to meet them

# The updated definition of **DT** is **Digital Transformation DELIVERING VALUE BEYOND TECHNOLOGY**

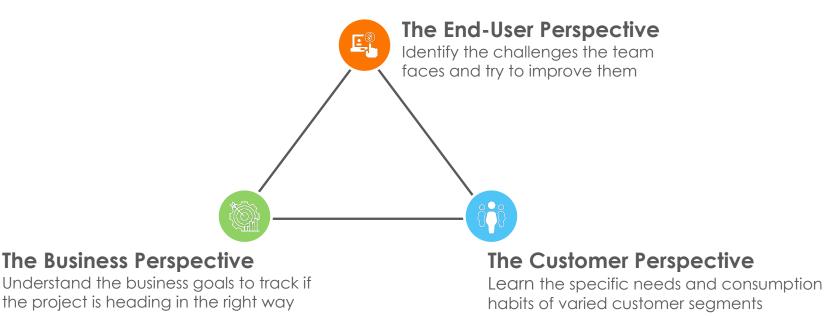

# Change Management is the Key to a Successful DT Project

There's no denying that digital transformations require technology solutions – but successful DT projects heavily rely on the execution of **change management** 

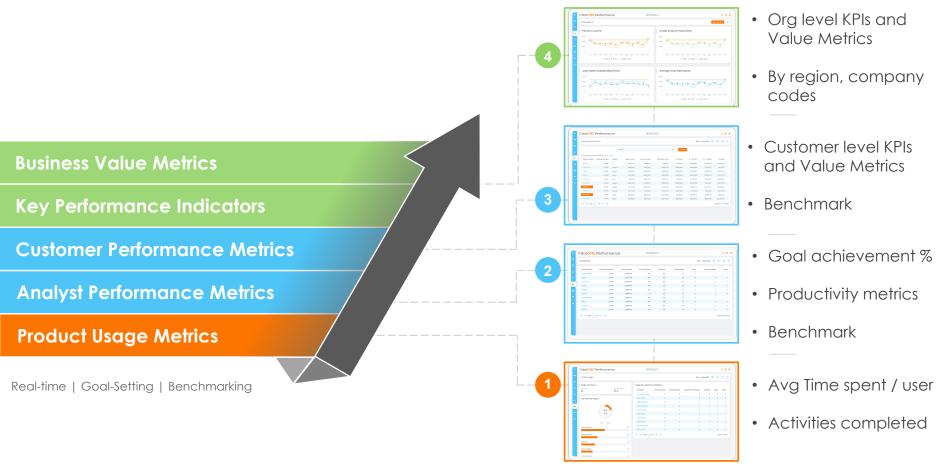

# The Three-Perspectives for A/R Digital Transformation

Consider these perspectives and how they will be affected during transformation

A/R leaders need a framework to help them realize the value they initially wanted out of these projects.

## The Bottom-Up Approach to Track the Success of Your A/R Digital Transformation

# A/R Value Realization Framework to Get the Desired ROI Out of DT Projects

Note : Colored shapes next to the VMs in each product area match the KPIs on the list below them, indicating which KPIs directly contribute to improving that specific Value Metric.

CREDIT	EIPP	CASH APP	DEDUCTIONS	COLLECTIONS			
		VALUE METRICS (VM)					
Percentage Current Credit Analyst Productivity		Analyst Productivity       Reduce Bank Fee		Percentage CurrentAverage Days Delinquent			
Reduce Bad Debt	Cost of Invoice Delivery	•	Reduce Write-off	Collector Productivity			
Increase Sales	Cost of Payment Processing						
		KEY PERFORMANCE INDICATORS (KI	PI)				
Number of Risk Class Changes from Credit Reviews	<ul> <li>♦ Customers with Confirmed Delivery of Electronic Invoices</li> </ul>	Item Level Hit Rate	% Invalid Deductions	Number of Outbound Collections Calls			
Average Time to Review New Applications	Clickthrough Rate of     Dunning	Check Character Capture Value	% Invalid Deductions Collected	Amount of Promise to Pays Created			
% of New Applications Auto Approved	% of Customers Paying Electronically	% of Deductions Auto Coded	Average Days to Resolve a Deduction as Valid or 📃 🔺 Invalid	Number of Manual Email Correspondences			
Average Time to Review Blocked Orders	<ul> <li>% of Payments</li> <li>Converted to Level III</li> <li>Processing</li> </ul>		% of Deductions Accurately Predicted as Valid or Invalid	Number of Automated Email Correspondences			
Number of Credit Limit Increase Reviews	•		% of Deductions Coded Automatically	% of Past Due Amount Untouched in a Two Week 🗧 🔺 Period			
Average Time to Review Existing Customers			% of Invalid Deductions Written-off				
% of Existing Customer Auto Reviewed	•						

# Driving Continuous Improvement From Your DT project INTRODUCING dotONE PERFORMANCE

The dotONE Performance is the combination of our experience and technology that delivers results from your order-to-cash digital transformation.

2

Deliver transformation projects that are on-time and In-budget

During the implementation stage, we are try to understand your requirements and delivering solutions that meet and exceed expectations. Take quick & corrective action by monitoring leading KPIs

Leading indicators help you see if your project is moving in the right direction and if not, you can take immediate corrective action. Ensure you receive long-term value by tracking lagging Metrics

3

Business Value Metrics are the lagging indicators that help you measure the success of your transformation, long after implementation has taken place.

# dotONE Performance Empowers Teams With Three Unique Benefits

# Real-time monitoring of indicators for proactive correction

Track indicators like Product Usage and Analyst Performance Metrics to learn if the project is creating a positive impact on the process early-on.

## 2 Benchmarking KPIs against best-in-class peer performance

Compare leading metrics (like cash application hit-rates) and lagging business value metrics (like DSO) against best-in-class peers to improve your O2C function.

# 3

# Visibility into global A/R performance and customer dashboards

Review the performance of different business units against your planned goals in a more visual format with the ability to pinpoint the challenges.
