

CREATIVE PARTITIONS FOR SCHOOL

Create a safe learning environment for everyone – students, teachers, front office, cafeteria staff... everyone!

We want to help you get back to learning and teaching, and custom desk partitions are part of the solution! The number one priority is to keep our kids and teachers safe, but sometimes student numbers and room size make it hard to keeping everyone six feet apart. Our custom desk partitions can help solve this problem and create a safe “bubble” for safer learning.
