

CloudOps Active Management Solution + FLEX

Reducing the cost of deploying, hosting, managing and maintaining your cloud infrastructure

at a Glance

cams^{FLEX} delivers high quality, flexible cloud hosting solutions on either AWS or Azure environments. It guarantees significantly higher cost reductions when compared with **cams^{COMPUTE}** by using a range of algorithms to select the best performing environment at the time whilst still achieving a 99.999% SLA. In addition, Flex gives customers additional storage and data transfer allowances as standard, free resources and full integration with **CloudOps Active Management Solution** from **igroup** to proactively manage and support your cloud.

Benefits of

Fully Customisable – **igroup** will use a range of algorithms to select the best performing environment, either Azure or AWS, and deploy the environment which will maximise the performance of your applications and services to help you achieve your business objectives.

20% Discount on Compute Costs – The **igroup** team will configure your environment on either Microsoft and Amazon to access significant discounts on compute and resource costs and migrate your infrastructure from time to time to maintain the cost savings.

Fixed Monthly Costs – With **cams⁺_{FLEX}** your cloud costs will be fixed and forecastable with no hidden charges or sudden increases.

Additional Storage and Data Transfer Allowances as Standard – Your cloud environment will be specified with more storage and data transfer capacity than you need so, if it is required in the future, there are no cost increases or performance limitations.

30 Day Invoicing Terms, Not Credit Cards – All **cams⁺_{FLEX}** customers are invoiced on standard 30 day terms to help you plan your cash flow and remove any surprise bills.

A Pre-deployed Development Environment – **cams⁺_{FLEX}** includes a dedicated pre deployed test environment on standby. It is configured to match your live servers so that you can test your applications before deployment and is ready to be switched on instantly.

Full Integration with the CloudOps Active Management Solution – A fully managed support solution including performance and cost monitoring tools, support processes and general administration functions to manage your cloud.

Why You Should Choose

Our expertise and knowledge of the cloud allows you to concentrate on delivering your applications and services to your customers, not managing your infrastructure.

cams⁺_{FLEX} will give you:

- **Significant cost discounts** – **igroup** use a number of algorithms to select the cloud environment that gives you the highest possible discount, maintains a 99.999% SLA and keeps costs down. We deliver a fully supported, high quality infrastructure at a fraction of the cost you would traditionally pay.
- **Expertise** – We have already delivered cloud solutions for hundreds of companies and organisations across the UK and can bring this knowledge to your business.
- **Support** – With the **CloudOps Active Management Solution** built into your infrastructure we will be continually improving performance and operational efficiency of your cloud.
