Every single moment we attract, engage and delight your new Russian customers!

Security & Safety project is an affective community of professionals, uniting our print edition and internet-portal

WE WON'T JUST PUT YOUR AD. WE WILL PROVIDE IT WITH STRONG EXPERT SUPPORT AND THE RIGHT AUDIENCE!
S&S magazine is a leader edition among Groteck’s publications, which is being issued since 1993 for top managers and security professionals in Russia.

Bimonthly we publish from 120 to 150 pages of information about newest technologies, perspective trends, successful implementation cases, best equipment and systems.

The coronavirus pandemic has pushed the development of digital technology. The journal’s expertise has been supplemented with electronic services: articles, news, product reviews, the online version of the journal is now available on the Secuteck.Ru website. Online events at Secuteck ADAPT have become a great alternative to traditional exhibition activities.

The magazine is distributed via free of charge pre-qualified subscription. Up to 10% of the circulation is being distributed via paid subscription. The edition is always presented at key industry events and professional security forums such as All-over-IP, International Forum of Security & Safety Technologies. Also the magazine is available for visitors of following events: MIPS/Securika, Sfitex, Interpolitex, Complex Security, ARMY show, Hi-Tech Building, ITSEC, and conference events held by advertisers.

We improve sending the magazine to End-Users and Governmental regulators as a hands-to-hands delivery. Also we do it at regular face to face meetings with End-Users, which we run during the year, and via targeted channels.
Key topics
- Video surveillance, machine vision
- Access control systems
- Biometric technologies
- Digital transformation: artificial intelligence, IoT, smart city
- Intelligent buildings, building automation
- Convergence of technologies
- Business analytics
- Video storage
- Neural networks, deep learning
- Protection of the upper hemisphere
- Cyber Security
- IT infrastructure, SDN networks, converged network
- Software platforms
- Identity management
- Security and fire alarm systems, fire safety
- IP technologies
- Complex security, system integration, PSIM platforms

We write about the technological changes that are driving the security market, talk about the problems, requests and requirements of customers.

Special projects
In each edition of the magazine we publish special materials from industry point of view and from technical point of view. We create special contents to make these publications more valuable. These special publications are distributed addressable to concrete audience groups.

Audience groups
We are constantly updating the database by categories: sales partners of advertisers of the magazine and participants of All-over-IP Forum and Forum of Security & Safety Technologies, design organizations, IT integrators, industry, construction, retail – more than 6 thousand organizations in total.

In 2020 we published

- 208 expert articles
- 46 advertising articles
- 128 AD layouts
- 68 interviews with End-Users
- 75 expert opinions
- 97 new products announcements
- 28 production reviews and tests
- 24 market reports

To advertise in the magazine please contact Galina Skochko skochko@groteck.ru
Why do they read the magazine?

62% to check new products
44% to find a problem solution
79% to get new knowledge

31% to find new suppliers
8,9% to plan purchase
39% to learn about advanced technologies

The annual audit of the subscriber base and focus on the largest customers gives our clients a consistently high level of prestigious audience.

Who reads the magazine

46% installers and design engineers
36% department managers
34% make collective decisions on purchases

30% end-users
35% technical specialists
31% decision makers

18% manufacturers, distributors
27% top managers
25% prepare purchase decisions

### KEY TOPIC OF THE EDITION

| Security of industrial, oil and gas and electric power facilities | Retail | Security of places/facilities of mass gathering. The pandemic lessons and the new reality |
| AgroTech |

**Special projects**

| 2. ACS for geographically distributed facilities | 2. Video analytics in retail |
| 4. Gas automatic fire detection and extinguishing systems | 4. High-tech equipment. Lens overview |
| 5. Shells for video cameras in difficult operating conditions | 1. Data center engineering infrastructure |

### DIGITAL TRANSFORMATION: AI, IoT, smart city

- Computer vision and video analytics as drivers of industry digitalization
- Digitalization of the security system in industry
- Implementation of an intelligent video surveillance system in a coal company
- New technologies at the big data market
- Retail: how to prepare business to digital transformation
- How to increase sales through big data, AI and logistics
- ThermoVision to detect people with high temperatures: application features, standards and recommendations
- Use of software and video analytics to recognize specific and threat-forming events
- Video surveillance vs coronavirus: temperature measurement, mask detectors, video surveillance over quarantine compliance in medical institutions
- Trends and forecasts of video analysis
- Pandemic as the trigger of digital transformation
- Artificial Intelligence for video surveillance systems
- Digitalization of urban infrastructure. Successful methods and approaches
- Cybersecurity, digital risks and threats
- How to make digital transformation successful: time to think and act
- New technologies at the big data market

### UNMANNED AERIAL VEHICLE SYSTEMS, ANTI-DRONE

| State regulation in the field of the safe use of UAVs | Practical experience of using the unmanned aircraft. Works performed with the use of UAVs |

### BUSINESS, IDEAS AND SOLUTIONS

Secrets of video surveillance manufacturers. How to distinguish advertising from reality

| “The devil is in details.” How to read Datasets from IP cameras. Simply about complex |
| Etiquette in international business. What you need to know if you work in several countries |

### VIDEO SURVEILLANCE

- How to improve the efficiency of video surveillance system at the facility
- The use of video analytics to improve the efficiency of production processes, monitoring and quality control
- How hardware video analytics improves the video surveillance industry
- Thermovision to detect people with high temperatures: application features, standards and recommendations
- Import substitution in video surveillance systems
- Design features of video surveillance systems with video analytics at retail facilities
- Use of software and video analytics to recognize specific and threat-forming events
- Video surveillance vs coronavirus: temperature measurement, mask detectors, video surveillance over quarantine compliance in medical institutions
- Trends and forecasts of video analysis
- Machine vision cameras: interfaces, sensors, functionality
- Use of software and video analytics to recognize specific and threat-forming events
- Video surveillance vs coronavirus: temperature measurement, mask detectors, video surveillance over quarantine compliance in medical institutions
- Trends and forecasts of video analysis
- Machine vision cameras: interfaces, sensors, functionality

### MACHINE VISION

Application of machine vision to solve production problems: gassing of coke batteries and security

| Ensuring the specified image quality. Machine vision cameras: interfaces, sensors, functionality |
| Computer vision in the HR service |
| 8 examples of using computer vision |

### IN THE FOCUS

Testing of 4K dashboard cameras

| Review of cameras with Wi-Fi up to 4 Mpx |
| Review of cameras with built-in video analytics |

### Smart Building: Comfort, Security, Digital Services
- Digital zoning of the cloud platform of accounting and analysis of production data in the field of water supply
- Smart communications: a digital platform for residents and a management company

### How Regions are Switching to the Management Based on Big Data
- Cybersecurity: how to protect an enterprise in the era of Industry 4.0
- Digital transformation, security and clouds
- Target orientation of digital transformation processes

### How Big Data and Artificial Intelligence Manage the Security of Companies
- Features of ensuring cyber security of train traffic management systems
- The problem of cloud computing privacy

### Development of the Unmanned Aircraft Market
- Current state, international and Russian experience

### Modern Technologies and IT Solutions for Unmanned Aircraft Systems
- Methods and means of countering UAVs

### What is Beyond Security and Why is this Market Constantly Growing?
- 10 tips for a video surveillance specialist for career growth

### Win-Win Strategy in the “Integrator – Customer” Relationship or Why to Develop the Competence of End Customers
- Predictive analytics based on behavior
- The use of video analytics to improve the efficiency of production processes, monitoring and quality control
- Auto-tracking of objects using PTZ
- Tasks to be solved. Limits of applicability
- Video analytics in regulatory documents of Russia

### The Use of Video Analytics to Improve the Efficiency of Production Processes, Monitoring and Quality Control
- The use of video analytics to improve the efficiency of production processes, monitoring and quality control
- Auto-tracking of objects using PTZ
- Tasks to be solved. Limits of applicability
- Video analytics in regulatory documents of Russia

### Application of Machine Vision Systems for Railway Transport
- A sharp eye for AI. Embedded machine vision systems as a cost-effective and efficient platform for neural networks

### Review of Cameras with Cloud Video Surveillance
- Testing of cameras with a motorized lens at sub-zero temperatures
- Review of PTZ night vision cameras

### ACCESS CONTROL SYSTEMS
- ACS in hydropower: protection of hydroelectric power plants and dams. The monitoring of the safety of surface and underwater water areas.
- The impact of the pandemic on technologies of access control.
- ACS trends based on video identification for critical infrastructures.
- Benefits of technologies of remote registration of visitors at business centers during a pandemic.
- Integration of medical information into ACS.
- Biometrics, Bluetooth and IP intercoms as components of a modern ACS solution.
- Experience of integrating ACS and security video surveillance systems during a pandemic.
- Barrier-free solutions in door automation for public places.
- Biometric solutions to fight modern threats: contactless ACS with thermometry.

### BIOMETRICS
- Promising technologies of image recognition using AI.
- Contactless access in practice. Pros and cons of technologies, the possibility of their combination.

### IDENTITY MANAGEMENT
- The implementation of IdM. Procedures and technical means, training and adaptation of employees.
- Features of providing access and information security in distributed automated control systems and information and measurement systems.
- Practice of combining access control to placements and information resources.

### INSPECTION SYSTEMS
- Development of inspection technologies. Market trends.
- X-ray inspection systems: technology’s secrets.
- Personal inspection in places of mass gathering.

### COMPLEX SECURITY
- Russian platforms for integrated security systems.
- Gas analysis system as a complex part of the safety of a hazardous production facility.
- Issues of total cost of ownership and operation of complex security systems. Comparative examples.
- Modern technical means of radiation, chemical and biological protection.
- Cybersecurity of complex security systems.
- Development and introduction (adoption) of domestic standards for various security systems. Differences between domestic and foreign standards.
- Complex system to fight the spread of infectious diseases.
- Implementation of PSIM. What is more important, a product or a project? New sources of complex threats.
- A system to monitor the deformation of bearing structures to ensure the safety of a unique sports facility.

### PERIMETER SYSTEMS
- Comprehensive security of oil and gas linear facilities.
- Key functions of systems of perimeter security. Identification of threats.
- Technical means to protect the perimeter of places of mass gathering.

### CONVERGENCE: SECURITY AND AUTOMATION
- New aspects of building automation.
- Artificial intelligence as a building automation tool.
- Expected challenges of building automation and cognitive buildings.

### FIRE & INTRUDER ALARMS, FIRE SAFETY
- Improvement of the regulatory and legal basis to ensure fire safety at facilities of mass gathering and a deserted technological process.
- Reliable and fault-tolerant fire safety system in the light of new standards.
- Fire alarm systems and complex integrations. New security opportunities.
- New rules of fire safety regulations: practical application.
- Current problems of fire safety in retail.
- Risk-oriented approach to the state fire supervision.
- Mandatory fire insurance of facilities of mass gathering.
- Main problems during the examination of project documentation of buildings and structures.

To bring our clients closer to end users and sales partners who are looking for business opportunities in specific industry projects, we have developed industry focuses and special projects. Study the thematic plan, choose the most relevant for you.

**№ 1/2021**

**Security of industrial, oil and gas and electric power facilities**
1. COVID-Tech. Contactless systems for automatic monitoring of violations of the temperature regime and detection of the presence of a medical mask on the face
2. Access control for large industrial enterprises
3. Cybersecurity of the digital enterprise
4. Gas automatic fire detection and extinguishing systems
5. Shells for video cameras in difficult operating conditions

**№ 2/2021**

**Retail**
1. COVID-Tech. Biometric solutions to fight modern threats: contactless ACS with thermometry
2. Video analytics in retail
3. Security monitoring. Software for security companies
4. High-tech equipment. Lens overview

**№ 3/2021**

**Security of places/facilities of mass gathering. The pandemic lessons and the new reality**

**AgroTech**
1. Data center engineering infrastructure
2. Biometric readers of ACS
3. Smart parking systems
4. IP video camera with built-in turning devices
5. Aspiration systems

**№ 4/2021**

**Smart city, digital region**

**Implementation of intelligent technologies in the utilities sector**
1. COVID-Tech. The air disinfection system and disinfection of objects. Tunnel passageways with sterilization systems
2. Intercom systems
3. Electromagnetic locks
4. Address wire system of security and fire alarm

**№ 5/2021**

**Digital transformation of the financial sector: trends and forecasts**

**Biometric acquiring**
1. ACS controllers for medium and large capacity systems
2. Secure remote access
3. Integration systems
4. Module fire extinguishing systems

**№ 6/2021**

**Transport. Improvement of technological security and regulatory framework**
1. Surveillance on facilities of transport infrastructure
2. Equipment for passenger and baggage inspection
3. Perimeter protection
4. Data storage systems
5. Reception and control devices, security and fire equipment

How to participate

We have developed several service packages. You can choose to publish news, articles, or present specific products and solutions.

Each service package has additional benefits: news automatically gets to Facebook, as well as to the weekly newsletter Secuteck Weekly. when an article is published with the title placed on the main banner of the website or when participating in a special project, advertisers can publish their news on the website for three months.

Our website is created on a modern platform that is well indexed by search engines. Additionally, we can develop a promotion plan for you using contextual advertising in Yandex.Direct and / or Google AdWords.

News

What do you get:

- Company press releases (up to news a month) will be published in the news section on secuteck.ru
- The content will be promoted in the S&S Magazine’s Facebook and VK account
- News content: press releases, news, promotions, announcements of upcoming company events, etc. (up to 10 items per month)

Number of website views each month
72 300
Average number of website views per day
1980
Number of unique visitors a month
30 390

Technical review

Placing a product description in a Special Project (industry focus or products and solutions review) on the website Secuteck.Ru and in the Security&Safety magazine

- 3 months of publishing your news
- Special distribution program: targeted delivering of printed and electronic versions to managers and specialists of the industry, which is the issue of the magazine is dedicated to

Cost for package
955 €

Prices are in euros including VAT

To submit the article please contact Galina Skochko skochko@groteck.ru
Advertisers get complex service for their advertising and marketing campaigns.

Advertiser’s package includes basic AD placement (under the standard price list) and additional package of complimentary placements, which dramatically increases visibility of the AD campaign in the edition and make it maximally native.

We represent customers and their competence in different editorial formats, in the context of reader’s interests.

We recommend our customers most popular topics and formats for additional complimentary editorial placements. Thus, our advertisers unobtrusively “await” for readers where they search for concrete content and look for answers to their questions.

FORMATS: editorial articles, expert comments, interview with top management “in Forbes style”, interview with satisfied customer of the company, technical reviews and bench tests.

Advertisers of all 6 editions of the magazine during the year participate in SPECIAL PROJECTS rubric or INDUSTRY FOCUS rubric free of charge.

IMAG version of the magazine (flip-book) is easy to read from anywhere: you can save needed page or print it. All hyper-links in advertisers’ publications are active. HTML version of the magazine is being easily searched by search engines.

Content syndication

With a help of white paper you can highlight the most actual industry agenda and your role in it. We guarantee 30 leads for every white paper promotion we run on the website. The best results come from non advertising papers.

The package includes:

• Placement of your white paper on secuteck.ru for downloading
• Two email shots throughout our unique base of customers (we segment your list taking into account your audience)
• Yandex.Direct and Google AdWords digital AD (during the week)
• The list of leads and the statistics by views/clicks after the campaign

Cost per campaign 2370 €

Remarketing

Displaying your advert on thousands of other popular websites and driving those users back to your website. Provide us with your campaign adverts and we’ll do the rest for you.

How it works:

• On a daily basis secuteck.ru is visited by thousands of visitors from professional security community
• Each visitor is assigned a specific identification code. After that your AD message will be shown to potential client on third-party sites and resources
• Your AD will be linked to your website
• In the end of campaign we will provide you with the statistics by view/clicks

Cost per month 2190 €

Online advertising

Draw more attention to your brand by placing your banner on the top position of the website! With over 34 508 views and over 18 953 visitors per month we will promote your company and get it seen by decision makers across the industry. The banner clicks will be also tracked to give you accurate statistics (top position on top, the size: 1000x50 px).

Cost per week 264 €

Prices are in euros including VAT
Email opportunities

Sponsored e-newsletters – we’ll add your banner to our Secuteck Weekly newsletter and send it out to a targeted audience through the database of 1500 active subscribers.

Cost 166 €

Sponsored e-reviews – send your message with any information regarding your company/ products/services to our readers and your potential clients. We have an opportunity to select list of recipients according your target segments + provide you with the statistics by view/clicks.

Cost 1854 €

Sponsored content

- The content will be published on the top position of secuteck.ru for one week
- The content will be branded with your company’s logo and hyperlinks back to your website
- The content will be promoted in our Secuteck Weekly e-newsletter to the base of 1500 active subscribers
- The content will be promoted in the S&S Magazine’s Facebook account
- Web traffic/impression report so you can check the number of professionals your content is reaching
- 3 months of publishing news

Cost per month 2500 €

Webinars

Demonstrate your knowledge and expertise on industry most topical issues. Get to know your target audience as well as understand their requirements.

Secuteck.ru will become the place to promote your webinar via newsletters and website, attract attention to your company, gather an audience and will let to held post-questioning to collect impressions and wishes.

The package includes:

- Two newsletters throughout our base (we segment the list taking into account your audience)
- Two posts in the blog
- Placement of banner on the main page of website during the week
- Automated questioning of the leads after the webinar and collection of impressions (the data will be sent to you)

Cost 2000 €

Prices are in euros including VAT
Effective community of professionals
