

MEET PEOPLE, NOT RESUMES

Make It Personal With Smart Video Interviews

myInterview integrated with Greenhouse takes the hiring process to another level with smart, one-way video interviewing. Save time, review and collaborate with your team while bringing personality and authenticity back into the hiring process - all from inside your Greenhouse workflow. It's time to get to know the personality behind the resume and meet your candidates before they walk through the door!

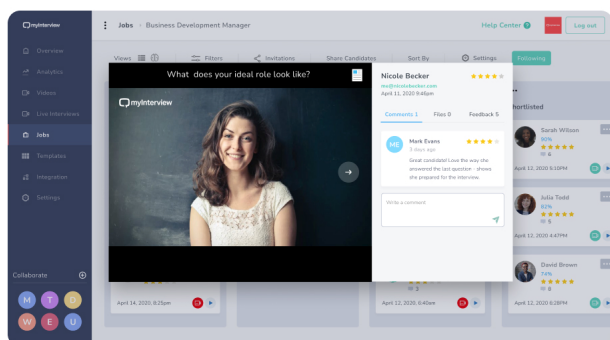

Why myInterview?

myInterview's asynchronous video interview platform integrated with Greenhouse allows a candidate to answer pre-defined interview questions in the initial screening stages - often in place of a phone interview.

Efficiency - Video interviews save you time meeting candidates. No more phone tag or delays, one-way interviews shorten the hiring process, right inside of Greenhouse.

Collaboration - Share candidate videos with hiring managers in seconds so you don't miss your next star hire or waste time on the wrong candidate.

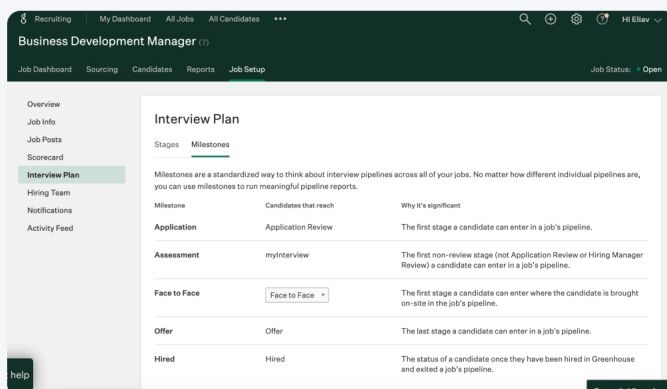

Personality - Greenhouse and myInterview allow you to track your candidates and gain valuable insights about your hiring funnel, all while giving candidates the opportunity to express themselves.

Integrate simply

Integrate myInterview video interviews in 3 easy steps:

- 1- From your Greenhouse dashboard add myInterview as a stage in your Interview Plan.
- 2- Send candidates invitations to complete the video interview directly from within Greenhouse.
- 3- Review, comment and rate candidate videos from the candidate card in Greenhouse, making it easy to keep track of everyone in one place!
