

Reading Plus Students Across All Tier Groups Achieved Significant Reading Proficiency Gains

A study of 259,140 students found that those who used Reading Plus achieved statistically significant reading proficiency gains. In addition, students who completed the recommended amounts of instruction achieved significantly larger gains than their peers who completed little or no Reading Plus instruction.

Study Sample

259,140 students who completed two or more InSight reading assessments

Schools

2,571

School Districts

1,220

Study Inclusion Requirements

- Students in grades 2 through 12
- Students with fall 2018 (pre) and spring 2019 (post) InSight assessment scores

Students Excluded

- Students for whom valid reading rates could not be calculated

Distribution of Students:

- Elementary School (grades 2 through 5) n=46,007
- Middle School (grades 6 through 8) n=133,543
- High School (grades 9 through 12) n=79,590

Purpose of Report

This report describes the reading progress achieved by Reading Plus students who were enrolled in grades 2 through 12 during the 2018-2019 school year.

InSight – Computer Adaptive Assessment

InSight provides measures of reading comprehension, vocabulary, comprehension-based silent reading rate, and motivation, as well as a composite reading proficiency grade-level score. Results can readily be compared with nationally normed standardized test results ([see correlations here](#)). A detailed review and evaluation of InSight’s reliability, validity, and classification accuracy can be found on the [National Center on Intensive Intervention](#) website.

Proficiency Growth by Reading Proficiency Tier

More intensive use of Reading Plus is recommended for students who are reading below grade level and need to catch up with their peers. Figures 1-3 show the amount of reading proficiency growth achieved by students who started the school year at or above grade level (Tier 1), below grade level (Tier 2), or well below grade level (Tier 3), and completed no Reading Plus lessons, approximately 60 lessons, or at least 120 lessons.

Elementary School: Reading Proficiency Growth by Amount of Reading Plus Use

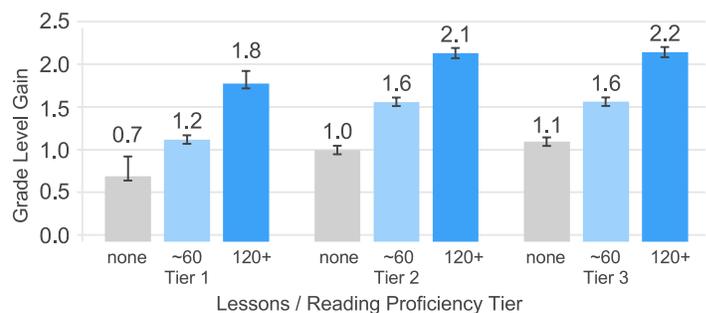

Figure 1. Proficiency gains (+/- SEM) achieved by elementary school students. Three levels of Reading Plus use are shown for each tier group: Tier 1 (at/above grade level); Tier 2 (below grade level but less than three grades below); Tier 3 (3+ levels below grade level). Elementary school students who completed 120+ Reading Plus lessons achieved large reading proficiency gains in all tier groups (Tier 1, 1.8 grade levels, $p < .001$, $d = .78$; Tier 2, 2.1 grade levels, $p < .001$, $d = 1.56$; Tier 3, 2.2 grade levels, $p < .001$, $d = 1.93$). These gains were significantly larger than those of their peers who did not use Reading Plus (Tier 1, $p < .001$, $d = .59$; Tier 2, $p < .001$, $d = .77$; Tier 3, $p < .001$, $d = .77$).

Middle School: Reading Proficiency Growth by Amount of Reading Plus Use

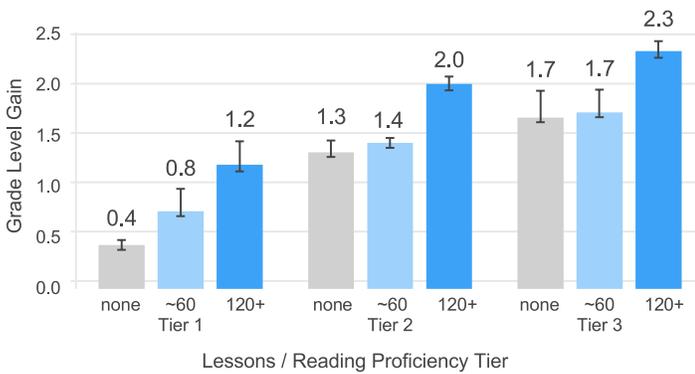

Figure 2. Reading proficiency gains (+/- SEM) achieved by middle school students. Three levels of Reading Plus use are shown for each tier group: Tier 1 (at/above grade level); Tier 2 (below grade level but less than three grades below); Tier 3 (3+ levels below grade level). Middle school students who completed 120+ Reading Plus lessons achieved large reading proficiency gains in all tier groups (Tier 1, 1.2 grade levels, $p < .001$, $d = .62$; Tier 2, 2.0 grade levels, $p < .001$, $d = 1.24$; Tier 3, 2.3 grade levels, $p < .001$, $d = 1.51$). These gains were significantly larger than those of their peers who did not use Reading Plus (Tier 1, $p < .001$, $d = .50$; Tier 2, $p < .001$, $d = .37$; Tier 3, $p < .001$, $d = .36$).

High School: Reading Proficiency Growth by Amount of Reading Plus Use

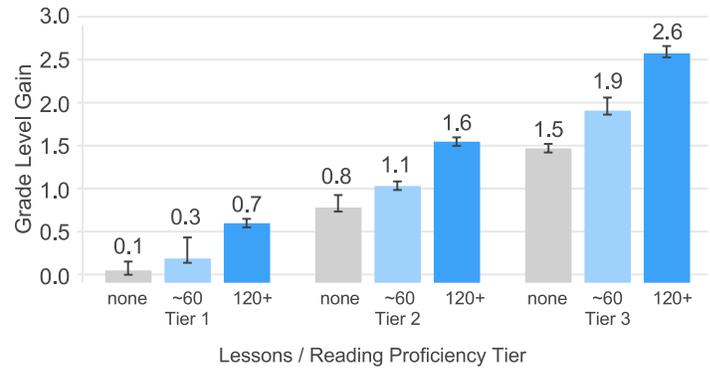

Figure 3. Reading proficiency gains (+/- SEM) achieved by high school students. Three levels of Reading Plus use are shown for each tier group: Tier 1 (at/above grade level); Tier 2 (reading at a middle school grade level); Tier 3 (reading at an elementary school grade level). High school students who completed 120+ Reading Plus lessons achieved large reading proficiency gains in all tier groups (Tier 1, 0.7 grade levels, $p < .001$, $d = .49$; Tier 2, 1.6 grade levels, $p < .001$, $d = 1.10$; Tier 3, 2.6 grade levels, $p < .001$, $d = 1.40$). These gains were significantly larger than those of their peers who did not use Reading Plus (Tier 1, $p < .001$, $d = .38$; Tier 2, $p < .001$, $d = .40$; Tier 3, $p < .001$, $d = .52$).

Summary

The results of this study show that students in all grade levels who engaged in Reading Plus instruction over the course of the 2018-2019 school year significantly increased their capacity to comprehend increasingly complex texts, developed their capacity to understand higher levels of general academic vocabulary, and improved their reading efficiency. Students who completed more Reading Plus lessons achieved significantly larger gains than their peers who engaged in little or no Reading Plus practice. The results also show that the students who engaged in more Reading Plus instruction developed more reading confidence and increased their interest in reading. This in turn increases the likelihood that they will continue to use reading as a means to expand their knowledge, to be entertained, and to seek inspiration.
