Nursing Meditech Access is Expanding and Standardizing- Inpatient Huddle – CA/NV

HCA Healthcare

Intended for: Inpatient/Women's Services/Rehab/Behavioral Health Nurses – FW facilities

What is Changing: Meditech menu updates, desktop buttons on Status Board and added access for all facilities in your Market in case you need to assist in an urgent situation.

A. To see new buttons and attached menus - Click on the **MORE** button at the bottom of your buttons list (PR-RN) prior to the Go Live date.
- **New Variance button** is new main menu minus Print Reports and Kardex/Handoff/etc submenus.
- **New Print Reports button menu** is just the Print Routines and Kardex/Handoff/etc submenus.

B. Logging into Meditech - Database

options will change to see **all of the facilities in your Market** and the PCI database.
IMPORTANT: **Be sure to select the right facility**

C. Status Board Updates
- **Status Board default** - Charge Nurses will also now go straight to the Status Board.

- **Order changed for Desktop Buttons** as shown here for ALL Nurses. The Patient Notes and Flowsheet buttons have been removed – go to Process Interventions, or Patient Care Routines sub-menu as needed for these 2 items.

- **New Status Board Magic Menu** includes all details from all of the button menus along with the Unit/Chg Nurse Reports menu.

      Exit
```

D. Magic Menus:

You will see different magic menus in NUR, EDM and SCH/ORM modules depending on what routine you are in at the time.

E. PCI Menu Standardized

We encourage everyone to use Clinical Review as your first stop for patient record review, but if you go to PCI you will see a New standard PCI menu. Items reordered to be alphabetical except for a few items at the top of the menu as shown here.

```
