

# Overcome the challenges of coordinating transformation

**As with any migration, when it comes down to the execution of a data center move, the stakes are high, and the risks of failure, compromising data fidelity, or costly delays are well documented.**

These events typically involve a huge amount of pressure, encompassing a lot of moving parts and people, all working to get things done seamlessly, on time, and with no downtime. Mobilizing and orchestrating teams to deliver toward highly strategic goals is extremely challenging given the complexity, length, and volume of transformation initiatives. In addition, enterprise-wide visibility of transformation is nearly impossible for stakeholders because much of the work is hidden in spreadsheets, phone calls, and emails.

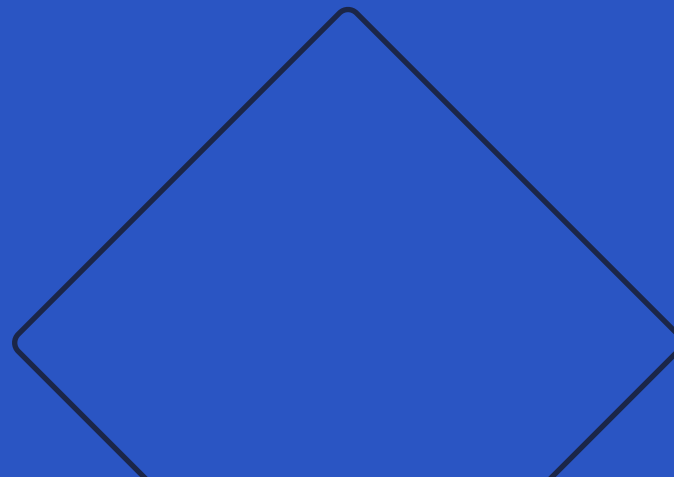

A white line graphic on a blue background, starting from the left edge, extending horizontally, then angling upwards to the right, and finally angling downwards to the right, ending near the top right corner.

“

The ability to automate communications to stakeholders across the business through one system enables us to manage change consistently, avoiding negative impacts on customers and increasing the business' confidence in a successful delivery.”

**Matt Cox**

Head of Insight & Innovation,  
Nationwide Building Society

# Work Orchestration and Observability for transformation

Cutover is a leader in Work Orchestration and Observability. The Cutover platform supports the success and efficiency of transformation programs by bringing planning, orchestration, and analysis into one platform.

## Plan

Cutover's Timeline provides a comprehensive, long-term view of your initiative to help plan, coordinate, optimize, and de-risk upcoming events. Using Cutover's unique Runbook technology, detailed plans are easy to create, template, edit, and rehearse.

## Orchestrate

Execution is streamlined and coherent, with in-platform communications and automated notifications to keep the flow of work moving swiftly and smoothly. Senior stakeholders get a high-level overview of status and progress, with the ability to customize their view and drill down into the detail.

## Analyze

Access real-time analytics to ensure your transformation stays on track, and quickly identify potential issues or delays before they become problems. Use the analytics and full audit trail for compliance, and to conduct post-implementation reviews for ongoing improvement.

# Why partner with Cutover

As a leader in Work Orchestration and Observability, Cutover is helping some of the largest, most complex organizations in the world to navigate huge, multi-faceted transformations. The Cutover platform, developed with decades of experience in managing transformation, technology and business change and operational resilience initiatives, enables organizations to move quickly with confidence.

## Cutover benefits

- ◆ Understand the full scale of transformation initiatives through a single platform versus hundreds of static documents and siloed processes
- ◆ Make better decisions based on enhanced visibility for stakeholders
- ◆ Improve internal planning and processes through reporting, audit and analytics capabilities
- ◆ Improve collaboration across teams and organizations by streamlining communication channels into one interface
- ◆ Deliver change at speed through the orchestration of human and machine tasks
- ◆ Free up teams to focus on higher-value activities rather than administrative tasks
- ◆ Improve and refine processes through rehearsing and learning from the live execution of plans

# Our Clients

Cutover is trusted by well-known financial institutions all over the world, including leading global banks, two of the top three US banks by size, and three of the top five investment banks globally.

Schroders

Deloitte.
