

Work Orchestration and Observability for data center migrations

As with any migration, when it comes down to the execution of a data center move, the stakes are high, and the risks of failure, compromising data fidelity, or costly delays are well documented.

According to Gartner **70% of data center migrations will suffer significant time delays or unplanned downtime**, largely due to improper planning. So how do you avoid joining this majority?

How Cutover helps

Cutover's Work Orchestration and Observability platform provides teams with the ability to plan and build detailed, automated runbooks for their migration, and rehearse the entire process with dynamic, realistic run-throughs.

The platform overcomes migration oversight challenges, by providing real-time dashboards that can be easily shared with stakeholders to relay key milestones and overall progress.

We had the vast majority of staff remote. Trying to execute such a complex, multi-threaded and cross-party migration without Cutover would simply have been impossible. Thank you to the team for your help, guidance and support.

Project Implementation Manager,
British Multinational Asset Management Company

Why partner with Cutover

As a leader in Work Orchestration and Observability, Cutover is helping some of the largest, most complex organizations in the world to better manage critical business events. TheCutover platform coupled with decades of experience in managing transformation, technology delivery and release, and operational resilience initiatives for businesses, enables organizations to move quickly with confidence.

Cutover benefits

- ◆ Cross-team collaboration for the migration is smooth and unified, with integrated communications for Slack, Microsoft Teams, and email.
- ◆ Build out and track the progress of any migration pre-requisites to ensure smooth and full completion before go-live
- ◆ A library of templated runbooks enables organizations to move faster and improve consistency and repeatability
- ◆ Get a forward view of planned change and migration milestones
- ◆ Executive stakeholders are always informed by accessing live updates from real-time dashboards without disturbing operations
