

# Video Conferencing for Remote Teams

**As part of Cutover's commitment to enabling remote teams to orchestrate complex work better and faster, video conferencing is now available from within the platform.**

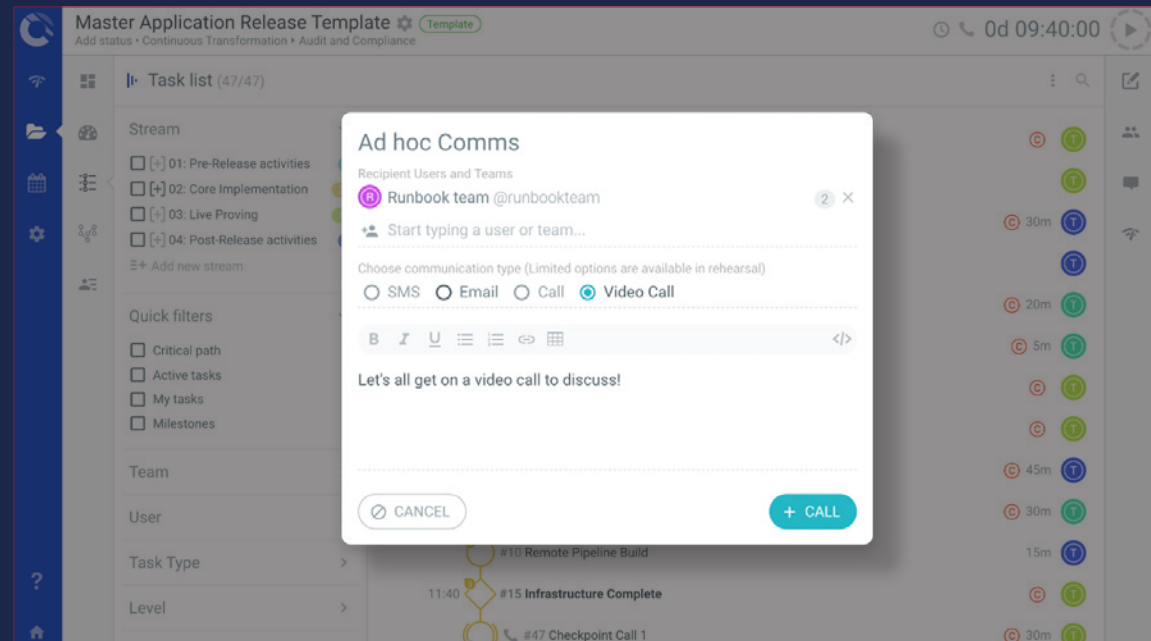

Powered by Jitsi™, Cutover runbook admins can host video conferences with teams or individual runbook members.

Effective communication is critical to efficient work, so when face to face collaboration is not an option, this feature enables teams to huddle around plans or issues as quickly as possible.

# Simple to use

From directly within a live runbook, runbook admins can click on the adhoc comms icon at the top of the screen, add in relevant team members to join the conference and simply start a video call. Team members will receive an email notification with a link to join. Simple and fast, when things are moving quickly, and you're tackling complex work, this feature ensures that team communication keeps pace with the tasks at hand.

Video calls are captured on the audit trail for full traceability, accountability and compliance.

### **Extend the value of video tools you're already using:**

At Cutover, we understand that our clients use many different collaboration tools including Zoom, Skype, GotoMeeting, and Microsoft Teams. We're currently working on a more bespoke solution for clients interested in integrating their own internal video tools into Cutover. Contact us for more information about this

### **Security Considerations**

Security is a top priority at Cutover and we know that's the case across our clients. We hold any external technologies or integrations to our extremely high standards. Cutover's video conferencing feature has gone through rigorous information security checks before deploying to our clients.

A blue-tinted photograph of a space station orbiting Earth. The station's complex structure, including solar panels and modules, is visible in the upper right corner. The Earth's surface below is covered in swirling white clouds, with the dark curvature of the planet's horizon visible at the top.
