## NEW & IMPROVED!

- Pick & Pack Feature
- Complete Inventory Control
- PPD Reporting
- HL7/ADT Interfaces

## Add Patients on the Go!

As part of the uCommand<sup>®</sup> family of products, uCommand Mobile is web-based software designed for home health agencies, DME's and Hospice's that allows you to place orders and manage your patient on the go.

Offering a single solution for all caregivers, uCommand Mobile provides a convenient system for ordering supplies and managing inventory. uCommand Mobile is flexible enough to handle formulary control across multiple vendors, PPD reporting, case load organization, various ship-to options and more.

## Advantages

- Multiple Ship-To Options
- Mobile SupplyKiosk allows nurses to place patient-specific orders
- Web - Based
- Car-Stock Option
- Locked Product Formulary
- Order History Retention
- Interface Capabilities
- Management Approval Capability
- Supply Closet Inventory Management

Utilizing a combination of barcode scanners and mobile devices, uCommand Mobile seamlessly integrates with all major EMR's.

You can easily track supply costs by patient, eliminate overspending with Par Levels and order limits and view PPD costs to efficiently modify budgets.
