

Infectious Disease Preparedness

How do you really know if your business has a proper plan in place?

Having an expert assist you in developing a **COVID-19 Safety Management Program** is the best way to accomplish today's challenges.

Don't make yourself or your business vulnerable! Managing infection control for your patients and staff on your own comes with risks. Developing an infectious disease preparedness and response plan is more important now than ever. Safelink's **COVID-19 Safety Management Program** can help guide your business in forming protective actions and documenting a plan against COVID-19 or any other infectious diseases.

Why choose Safelink's **COVID-19 Safety Management Program** ?

- Includes written documentation to meet OSHA's guidance in protection of workers & their families, patients & visitors from infectious diseases including COVID-19.
- Provides up to one hour of consulting to help guide the dental lab/practice on how to incorporate this planning into their health and safety program.
- Documents are delivered in a downloadable format.

COVID-19 Safety Management Program written documentation includes:

- Infectious Disease Preparedness & Response Plan—Return to Work Policy, Patient Screening Form, Employee Screening Form, Screening Policy for Employees, PPE Policy by Task, Hazard Assessment, Levels of Exposure, Safety Actions for Resuming Your Dental Operations, Employer Policy for COVID-19 Exposure Situations, FAQs for COVID-19 Exposure Situations
- Template for a Respiratory Protection Program when respirators are required—Medical Questionnaire, Fit Testing Criteria, Evaluation of Respiratory Protection due to supply shortages
- Resource Links
