

Health & Safety Manual Options

From Do-It-Yourself to a Customized Turn-key Manual
we have the solution to fit your needs

Electronic DIY Health & Safety Manual

- This Do-It-Yourself safety manual is easy to use, self-directed and self-paced
- An affordable way for the dental practice to develop its own custom-designed, workplace safety program to assist in meeting OSHA's written documentation requirements
- Customizing your own dentistry-specific safety manual is simple with easy-to-follow instructions and training tools
- Provides the most up to date content & includes COVID-19 written documentation
- Delivered in a downloadable, electronic/softcopy format

Electronic Customized Health & Safety Manual

- Delivered as an electronic download
- With a manual that's customized to *the dental practice's specific* procedures, the business owner can feel confident they will have all materials needed to meet OSHA's written documentation requirements and CDC guidelines
- Features most up-to-date info available to aid in addressing health and safety hazards in the dental workplace
- Includes all federal and any state OSHA required documentation plus tools to assist the practice with their safety training program
- Includes one hour of consulting to assist in manual prep

Hardcopy Customized Health & Safety Manual

- Includes all components of the electronic download as shown above plus a hardcopy manual—all documents are organized in a heavy-duty binder with color documents separated by tab sections. Includes shipping within the continental U.S. ground service

Program Content for All Safety Manuals

- All manuals include the following programs: Infectious Disease Preparedness & Response Plan, Bloodborne Pathogens / Exposure (Infection) Control, Personal Protective Equipment, Respiratory Protection, Chemical Safety / HazCom, Safety Procedures, Radiation Safety, Anesthetic, Medical Gases, Emergency Action Planning, Ergonomics, Safety & Health Training, Injury & Illness Recordkeeping, Equipment & Electrical Safety, Noise Monitoring, Silica Exposure Control, , plus more

State Plan Add-on

- All manuals are prepared for the federal OSHA plan; however, a state-specific plan for California, Michigan, Minnesota, or Washington is available for an additional fee
