

How Do You Know Your Safety Program Meets OSHA Requirements?

Conducting an assessment is vital to determining your dental practice's risk position and prevention needs in regard to patient and staff safety during today's challenges.

Virtual Dental Practice Safety Assessment

OSHA Compliance ■ CDC Guidelines ■ COVID-19 Infection Control

Safelink's consultant surveys your facility and your safety procedures. The virtual assessment is followed up with a written audit report. This interactive safety check-up includes review of:

- COVID-19 Return to Work Policy, Infection Control Practices & Procedures, CDC Guidelines, Analysis of Personal Protective Equipment use including respirators, Bloodborne Pathogen Standard, Sterilization & Waterline Procedures,
- Ergonomics, Anesthetic/Medical Gases, Radiation safety, Fire & Electrical safety, First Aid, Emergency procedures, Chemical safety/Hazard Communication, Equipment & Machine Guarding, Hazardous Waste Containment/

Why should the dental practice choose this virtual assessment?

- An economical and effective way of determining the practice's risk position regarding patient & staff safety
- Access to a safety expert familiar with the dental practice work environment, CDC guidelines & OSHA requirements
- A detailed written report of prevention needs is provided
- No travel expenses are incurred
