

# FIBER

WHY THE WIRES THAT DELIVER YOUR INTERNET ARE IMPORTANT

## FIBER

VS

## CABLE

Currently available

**250-2,000** Mbps

### Download Speeds

Currently available

**200-940** Mbps

Download speeds are important for applications like:

Currently available

**100-1,000** Mbps

### Upload Speeds

Currently available

**10-35** Mbps

Upload speeds are important for applications like:

## Cincinnati Bell's fiber investment by the numbers

**\$1 Billion**

amount Cincinnati Bell has spent to build out our fiber network, including FTTH

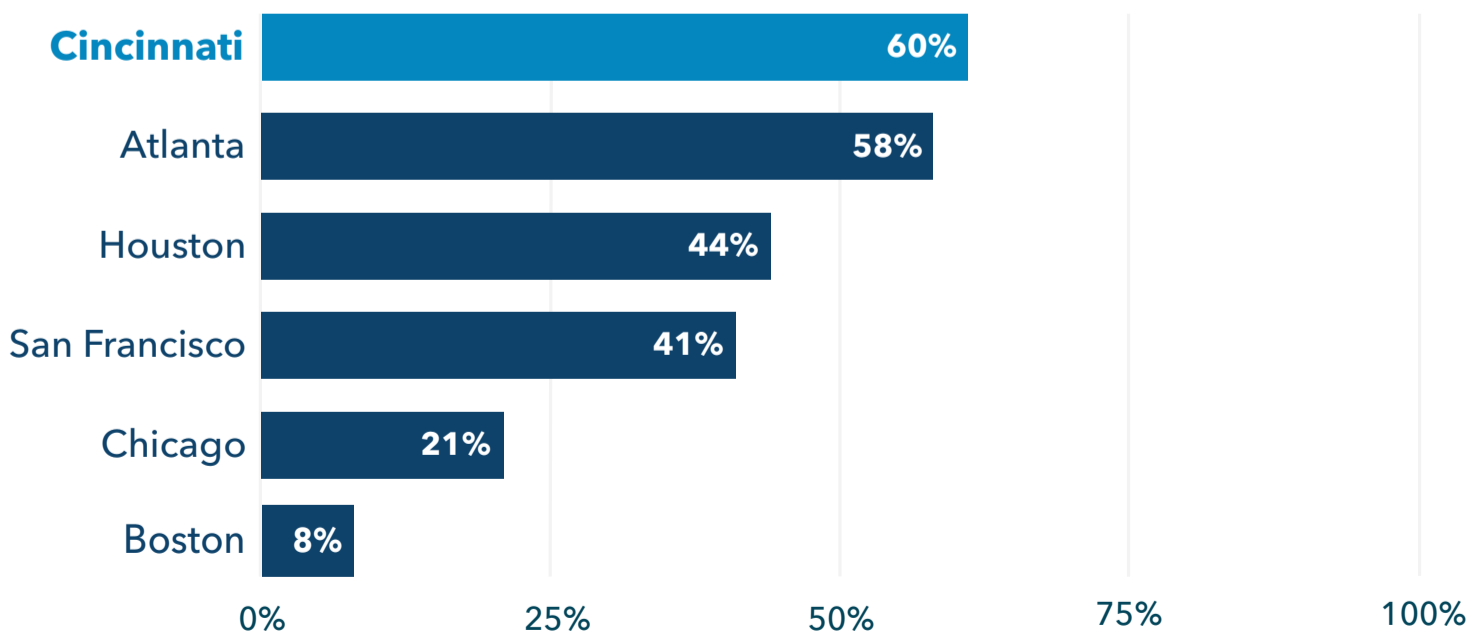

**60%**

of Greater Cincinnati homes and businesses have fiber to their premises

**10,000+**

miles of fiber-optic cable installed by Cincinnati Bell throughout the region

## Greater Cincinnati is now one of the most fiber-dense regions in the nation

Cincinnati fiber coverage data is sourced from direct provider reporting. All other fiber coverage data is sourced from FCC Form 477 filings and cross-validated through BroadbandNow with private datasets and direct provider reporting.
