

The safety and health of our members, team members, and guests are always Crunch's top priority. New York City now requires gyms and health clubs to admit patrons who have received at least one dose of the COVID-19 vaccine. We will begin accepting proof of vaccination status at all New York City Crunch locations starting August 16th. Per the City's mandate, we will limit gym access to only those vaccinated beginning September 13th.

After September 13th, all gyms and fitness centers in New York City will restrict facility access to those without at least one dose of the COVID-19 vaccine under the city's mandate.

We will note proof of vaccination status on your member account for future visits.

Beginning August 16th, you can provide proof of vaccination in-club with one of the following three options:

1	2	3
<p>Showing your CDC COVID-19 Vaccination Card (or a photograph of the card)</p>	<p>Excelsior Pass</p>	<p>NYC COVID SAFE iOS Android</p>
		

You are only required to show proof of your COVID-19 vaccination status once. **When you provide your proof in-club, we will review but not make or store a copy of your vaccination card.** If you forget your documentation, you can still access the club until September 13th. After that date, you must provide proof of vaccination status to access the gym.
