

## Arcade Technician

**Location:** FunBox Entertainment (UK)

**Position Summary:** The arcade technician keeps our arcade operating, even as technology changes and machinery inevitably begins to break down. They need to understand the underlying technology of a number of different games on the market. Whether it is a classic game or an advanced VR system, arcade technicians should be able to perform repairs and adjustments to ensure that all our games continue working properly. Technicians should be able to install and transport the units as needed. Which will require lifting heavy machinery.

### **Responsibilities:**

- Installing, maintaining, and repairing arcade machines
- Disassembling and reassembling arcade machines
- Lifting and transporting large machines
- Using hand tools to fix machines
- Keeping abreast of new technology
- Keeping records of all repairs
- Providing customer service to arcade owners
- Conducting tests on machines
- Ordering new parts as needed

### **Education/Training:**

- Trade school education, with an electronics background

### **Knowledge/Skills/Abilities:**

- Prior experience fixing arcade systems
- Basic knowledge of new trends in arcade games
- Knowledge of electrical systems
- Math proficiency and technical skills
- Ability to lift heavy objects
- Ability to work in hazardous environment
- Communication and interpersonal skills
- Willingness to complete continuing education courses in arcade repair

### **Travel Requirements:**

- Full UK driving license
- Required to drive to multiple sites as required

### **Materials and Equipment Utilized:**

- Standard tools and testing equipment

**Working Environment:**

- Working with people who are obsessed with a belief that by acting together we can and will achieve more
- A fast paced environment
- Ability to work and think independently
- Reporting into the Operations Manager
