CABINET TEST DISPLAY

16 Channel
120 VAC or 48 VDC

Overview

McCain's Cabinet Test Display is a simple and effective tool for displaying and testing the state of traffic signals in the field or test environments. Incredibly versatile, the Cabinet Test Display is compatible with most cabinets on the market today including ATC, ITS, Caltrans, and NEMA cabinets. Due to its small size, applying multiple displays in cabinets with more than 16 channels is easier than ever.

Benefits

- Simple and effective means to view traffic signal states
- Compact and easily portable
- Valuable troubleshooting tool

Product Description

A fifth of the size of its predecessor, the Cabinet Test Display's compact size makes it easily portable and storable in fully equipped traffic cabinets.
The 16-channel display indicators are colored and numbered for simplicity and have a designated white space for labeling. Red, yellow, and green indicators display the output status of the load switchpacks.
Available for 120 VAC or 48 VDC applications.
