

Instrument Training Options

Separation Science

At time of installation, your LECO Service and Installation Engineer will provide you with a basic overview of how to operate your instrument and get started. However, LECO knows that the key to success in the lab with any new instrument is understanding how it works for you. Our Separation Science instrument training classes will show you how to use your new instrument to its full potential. We now offer a variety of training options to meet your schedule and comfort level.

On-Site Training @ LECO

LECO on-site training classes are available several times a year at our headquarters in St. Joseph, Michigan. These 3-5 day courses include detailed software lessons, hands-on time with the instruments, and networking opportunities with other users. Travel expenses will be covered by the attendee. LECO covers all on-site transportation as well as meals.

Visit <https://www.leco.com/resources/customer-training> and click on "Mass Spectrometry Training Classes" for the most up-to-date schedule. To register for classes, please contact our training coordinator, Chris Cook at 269-985-5483 or chris_cook@leco.com.

Virtual Training

Virtual Training is ideal for customers who do not have the time or resources to attend one of our On-Site Training Classes. These live, interactive courses are conducted by LECO's training team via a web conferencing tool. Meeting times and topics can be arranged and customized to fit the attendee's schedule. This option is also ideal if you have multiple people from one lab or company that would like customized training. To schedule Virtual Training for you or your team, e-mail tof_service@leco.com or call 269-982-5483.

On-Demand Learning with LECOlearn

Our newest training option, LECOlearn allows for 24/7 access to organized training videos for our Pegasus® BT and BT 4D instruments so you can learn on your time, at your own pace. Videos are presented in course format by topic and designed to walk you through the natural progression of a typical training class. Access and re-watch any video, or any part of the video, at any time when you need clarity or review on a topic. LECOlearn is available to all current customers and is included as part of your instrument purchase, however a LECOlearn account is required to access the system. To request an account, visit info.leco.com/lecolearn.

Not sure what option best fits you? Contact our Separation Science Training Experts at 269-982-5483 or tof_service@leco.com for more information.
