Dynamic Duo
Restek’s Leak Detector and ProFLOW 6000 Flowmeter
An Unbeatable Combination
Prevent Small Leaks from Causing Big Problems with a Restek Leak Detector

Taking a few minutes to ensure all critical seals in the GC system are leak free prevents costly downtime, waste, and damage. Restek’s new electronic leak detector lets you pinpoint small gas leaks quickly and accurately before they cause bigger problems.

Detect a Wide Range of Lab Gases
Easily find leaks for a broad range of common lab gases with confidence. Restek’s leak detector helps you locate even low-level leaks of helium, nitrogen, argon, carbon dioxide, and hydrogen.

Easy Sampling
Optimized internal flow sweeps the sample path clean, permitting more sensitive detection.

Ready When You Are
No more waiting for a full charge—unit can be operated during charging or used up to 12 hours between charges.

Audible Feedback
You can determine the severity of a leak with an audible tone; no need to look away from the probe to check the LED display.

Flexible Charging Options
New charging kit includes both a USB charging cable and a universal AC power adaptor (U.S., UK, Europe, Australia, Japan) so you can charge anywhere, anytime.
ProFLOW 6000 Flowmeter

With its wide range of capabilities, the ProFLOW 6000 flowmeter simplifies gas flow measurement in the lab. Real-time measurements can be made for various types of flow paths, including continually changing gas types.

Ease of Use
Ergonomic design and side grips ensure comfortable handheld use; extendable stand makes conversion to benchtop use quick and easy.

Accurate Measurements
More accurate than a bubble flowmeter, the ProFLOW 6000 flowmeter is accurate to ±2% of the flow reading or ±0.2 mL/min, whichever is greater.

NIST-Traceable Calibration
You can rely on accurate calibration over the entire range of measurable flow rates. Recalibration service is also available to support preventative maintenance programs.

Volumetric Flowmeter
Measure the flow rate of any gas, including gas mixtures. Unlike mass flowmeters, this volumetric unit is not limited to a preset list of gases.

Extended Flow Range
Offering a wide range of flow rates, the ProFLOW 6000 flowmeter accurately measures flows from 0.5 mL/min to 500 mL/min.
**Dynamic Duo (Restek Leak Detector and ProFLOW 6000 Flowmeter)**

Protect your instrument and improve data quality with this powerful pair from Restek. Checking for leaks and verifying flows before you start running help you avoid costly problems later.

**Restek’s New Leak Detector**

Redesigned and better than ever, our new leak detector is an essential tool for troubleshooting and routine maintenance of your gas chromatograph. Don’t risk damaging your system or losing sensitivity; check for leaks often and protect your GC column and instrument with a Restek leak detector!

**Leak Detector Specifications**

- Detectable Gases: Helium, nitrogen, argon, carbon dioxide, hydrogen*
- Battery: Rechargeable nickel-metal hydride (NiMH) internal battery pack (32 hours normal operation)
- Ambient Temperature: 50–98.6 °F (10–37 °C)
- Humidity Range: 0–97%
- Warranty: One year
- Certifications: CE (EU, Korea, Japan, Australia)
- Compliance: WEEE, CEC, China RoHS 2
- Indoor Use Only

**Limits of Detection**

These gases can be detected with the Restek electronic leak detector at the following leak rates:

- Minimum Detectable Gas Limits and Indicating LED Color:
  - Helium, 1.0 x 10^-5, red LED
  - Hydrogen*, 1.0 x 10^-5, red LED
  - Nitrogen, 1.4 x 10^-3, yellow LED
  - Argon, 1.0 x 10^-4, yellow LED
  - Carbon dioxide, 1.0 x 10^-3, yellow LED

Gas detection limits measured in atm cc/sec.

Avoid using liquid leak detectors on a GC! Liquids can be drawn into the system and/or into the leak detector.

*Caution: The Restek electronic leak detector should only be used to detect trace amounts of hydrogen in a noncombustible environment. It is NOT designed for determining leaks in a combustible environment. A combustible gas detector should be used for determining combustible gas leaks under any condition. When using it to detect hydrogen, the Restek electronic leak detector may only be used for determining trace amounts in a GC environment.

**ProFLOW 6000 Flowmeter**

With its wide range of capabilities, the ProFLOW 6000 flowmeter simplifies gas flow measurement in the lab. Real-time measurements can be made for various types of flow paths, including continually changing gas types.

**Flowmeter Specifications:**

- Type of Flowmeter: Volumetric
- Battery: 2-AA
- Operating Temp. Range: 32–120 °F (0–48 °C)
- Warranty: One-year warranty (excludes recalibration)
- Certifications: CE, Ex
- Compliance: WEEE, RoHS 2
- Patented

**Optional Accessories**

- Soft-Side Carry/Storage Case
  - Ideal for storing your leak detector or flowmeter in smaller spaces such as a tool box.
- Small Probe Adaptor for Leak Detector
  - Verify hard-to-reach leaks using the small probe adaptor.
