omy. China has emerged as a rare bright spot as energy demand in the country remains relatively high. However, Beijing is taking advantage of the health and economic crisis to do a dramatic overhaul of its natural gas supply chains. China has shifted its attention from its traditional Central Asia supply hub further west where another natural gas and LNG powerhouse is emerging. The United States is emerging as the surprising winner as China, the world's second-largest importer of liquefied natural gas (LNG), continues to ramp up its LNG imports despite a buildup of tensions between the two nations. ### Supreme Court Says Pipeline May Cross Underneath Appalachian Trail

The Supreme Court ruled Monday in favor of a pipeline company in a dispute about whether a new 600-mile natural gas pipeline could cross underneath the Appalachian Trail on federal land. The 7-2 decision overturned one part of a lower court decision that had blocked construction of the Atlantic Coast Pipeline, which is being jointly developed by Duke Energy and Dominion Energy. The proposed pipeline would run from West Virginia to population centers in Virginia and North Carolina. In central Virginia, the pipeline would cross hundreds of feet underground beneath the Appalachian Trail where the trail runs through the George Washington National Forest.
