REQUIREMENTS

PROGRAM DETAILS

MedCerts online Professional Coder program provides comprehensive training that leads to the in-demand coding certification, Certified Coding Specialist-Physician-based (CCS-P), which is the gold standard for medical coding in physician office settings. Medical Coders holding professional-level certifications are critical to compliant and profitable medical practices and typically earn 20% more than non-certified coders. The primary objective for this program is to give the student the tools needed to successfully pass the CCS-P examination. Those passing the CCS-P examination earn the credential CCS-P.

Regardless of the choice of exam, students learn principles of medical coding related to the three main code books: CPT, ICD-10-CM Volumes 1 & 2 and HCPCS Level II. This program is recommended for anyone who is preparing for a career in medical coding for a physician's office and is vital in one's preparation for the CCS-P certification examination.

Upon enrollment, students will receive all necessary and required materials and coursework associated with the program. Students are not required to obtain or purchase any additional components.

Upon completion of the program, students are eligible for a MedCerts-sponsored 12-month membership to the AAPC or AHIMA, and complimentary voucher for the CCS-P examination.

COURSES

- HI 1014 Human Anatomy and Medical Terminology
- HI 1051 Medical Coder

-  Comprehend the fundamentals of human anatomy and medical terminology
-  Assign accurate medical codes for professional (physician) procedures, services and diagnoses
