

# API

## AlayaCare Integration and APIs

Unify your IT ecosystem management for automated data and cross platform workflows.

### Automate Data and Cross Platform Workflows

AlayaCare provides several REST APIs that enable IT teams and developers to access, modify and report on your organization's data and integrate with a number of solutions.

Enable efficient and effective data management

Maintain data integrity with accurate, intact, and safe information

Improve workflows and refine stakeholder management through streamlined access to data

Increase client experience with available data at every point of the care continuum journey

Extend core capabilities to partners, customers and developers

Reduce costs by unifying IT ecosystem.

“If you are looking for a system that will integrate with your other systems - your CRMs your learning management systems — **AlayaCare is the product for you.**”

**Justin Toon, Director Information Systems and Technology — Home Instead Senior Care**

# Bring the Power of Integration to your Enterprise

The AlayaCare APIs are designed to enable teams of any shape or size to build robust integrations that help them get the most value out of AlayaCare.

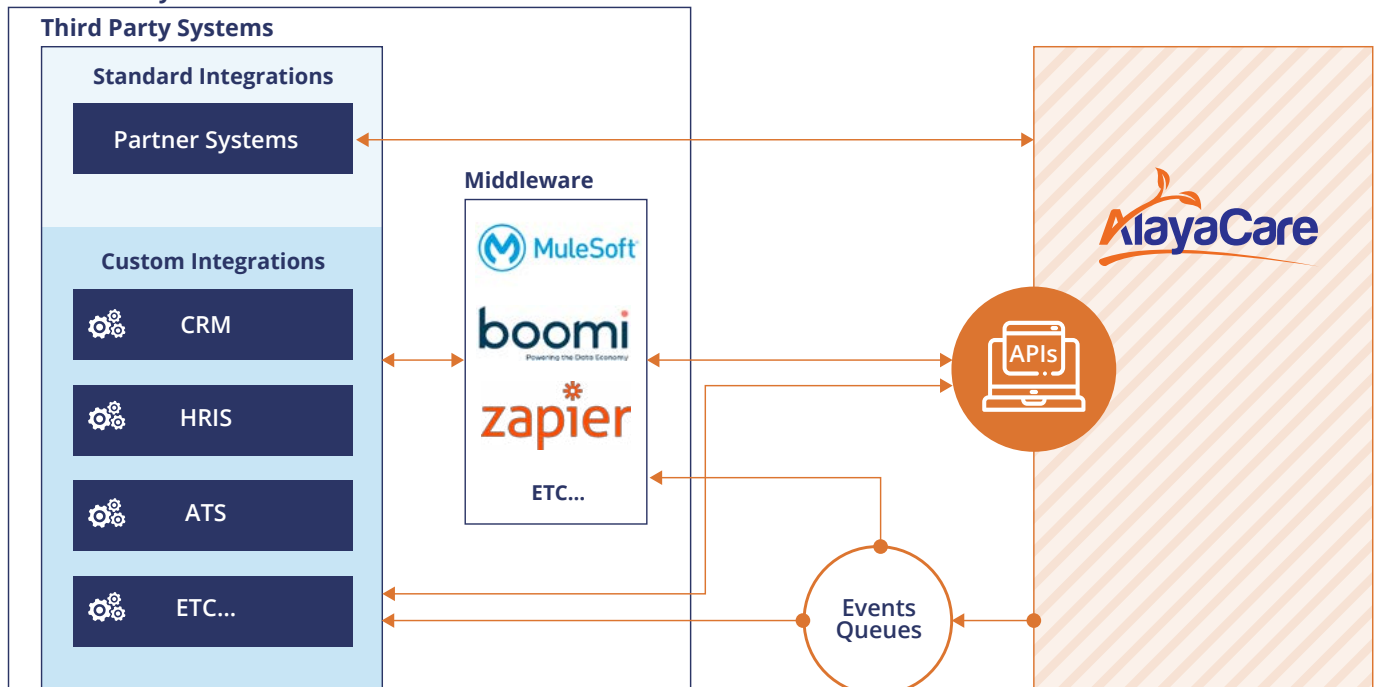

## AlayaCare APIs Available by Data Type

- ✓ Client
- ✓ Employee
- ✓ Scheduling
- ✓ Task
- ✓ File
- ✓ Clinical
- ✓ Accounting
- ✓ Intake

## Accelerate the Speed of your Business by Connecting Any System, Anywhere.

We leverage Amazon Web Services SQS queues to stream events from AlayaCare for your middleware to leverage two-way integrations and we support one-way integrations through the REST interface. This makes us one of the platform leaders in home care, providing the closest thing to a true platform in home care with a combination of functionality, flexibility and efficiency.

### Client IT Ecosystem

## Learn More About AlayaCare's APIs
