

Home Infusion Nursing Software

Providing home infusion and specialty pharmacy organizations with the tools they need to improve outcomes

Whether you are a **specialty pharmacy, home health care provider with in-house nurses, or a subcontracted provider**, AlayaCare has the tools you need to ensure your operations are handled efficiently.

The home infusion and specialty pharmacy markets are set to experience record growth. Post-acute care providers must act now to automate manual business processes to ensure high-quality care, or risk missing out on profitable growth.

Key Features

Optimized for all devices

Easy to use clinical documentation and GPS based punches

Tracking and managing care time vs. ongoing time

Electronic pre and post-infusion documentation

Schedule and route optimization for selecting best RN or subcontractor

Handle multiple offices or clinics within one system

Trusted Infusion Partners

Better Technology, Better Outcomes.

Scheduling

- ✔ Select best fit RNs based on required skills, qualifications, continuity, caseload and travel time using employee finder.
- ✔ Schedule both in-house infusions and ambulatory (clinic) infusion.
- ✔ Optimize daily schedules and routes.

Forms & Clinical Documentation

- ✔ Choose from a selection of pre-built pharma specific forms in form library.
- ✔ Match pharmacy specifications with custom form templates.
- ✔ Tailor your specific home infusion documentation needs with user-friendly form builder or custom Plans of Treatments and Plans of Care.

Dashboard & Care Management

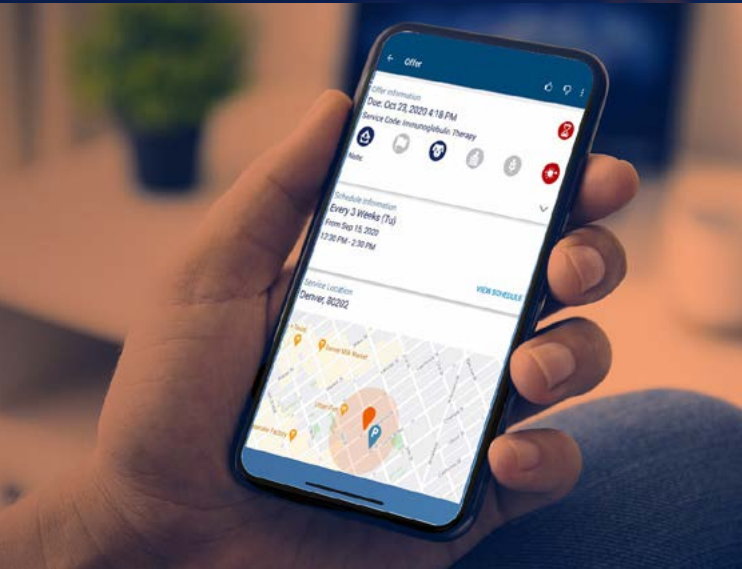

- ✔ Supervise field operations, KPIs, Alerts, and custom reports through dashboard view.
- ✔ Gain real-time visibility into GPS-based RN visits and real time scheduling adjustments.
- ✔ Track trends within documentation for outcomes-based planning and reporting.

Better Technology, Better Outcomes.

Product Overview (Continued)

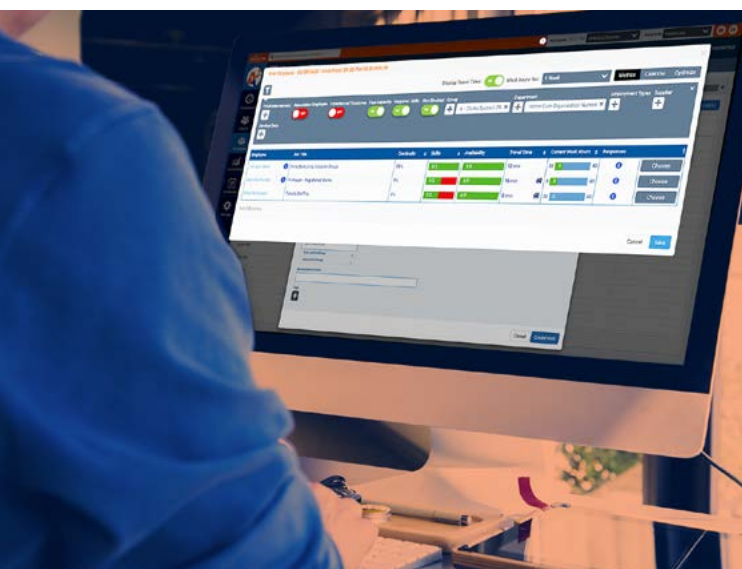

RN Mobile App

- ✔ Continue care management with access to all required clinical forms and documentation in either online or offline mode.
- ✔ Cut down travel costs with in-app travel-time calculations based on GPS-based punches.
- ✔ Provide RNs with mobile self-scheduling, tasks, visit offers, and schedule management.

Virtual Care

- ✔ Empower patients with secure access to care documentation, scheduled appointments, and digital forms for electronic signatures.
- ✔ Support virtual visits with HIPAA compliant video conferencing.
- ✔ Remotely deliver health checks and infusion care.

APIs & Integrations

- ✔ Easily integrate with pharmacy management solutions.
- ✔ Manage RN credentials and ensure compliance with built in HRIS capabilities.
- ✔ Streamline referrals with subcontracted nursing agencies.

Better Technology, Better Outcomes.
