Compatible with:	Processor:	Operative System:		Panel:
Flexxible IT® SMARTWORKSPACES	intel **Celeron** inside™	**Windows 10** IoT Enterprise	Emergent FHD Web Cam	**IPS**
CITRIX **Ready** HDX Technology				

LG Cloud Device

LG Cloud Device Manager

It's the optimized management software for the Flexxible IT Cloud Devices. When installing it on Cloud Devices with Windows IoT, the devices are centrally managed and controlled to improve work efficiency and lower the effects of TCO.

Make security more powerful

LG Cloud Devices offer greater protection of the company's sensitive and confidential information. With LG Cloud Devices, LG Cloud Device Manager helps IT managers to configure Thin Client devices such as restricting the use of unauthorized USB peripherals (storage, webcam) and preventing software installation.

Simply manage all ThinClients whenever you want

LG Cloud Device Manager offers easy and simple management of Thin Clients. IT managers are able to conveniently check the status of every Thin Client on the dashboard all at once. Web-based UI helps the administrator access and manage Thin Clients without additional installation of management programs.

Effectively reduce management work

LG Cloud Device Manager allows IT managers to manage Thin Clients easily. Centralized configuration and control through the Cloud Device Manager can save time and costs. This means IT managers can focus on other valuable tasks.

ENHANCED SECURITY

BETTER COLLABORATION

ACCESS AT EVERY MOMENT AND EVERY PLACE

BUSINESS CONTINUITY

Apps2Digital

Apps2Digital is an online evergreen lifecycle management service for virtual workspace applications. Through a wellness dashboard, the assessment capabilities of the service deliver key metrics of employee interactions with their digitalworkspaces.

Understanding applications and resources in use

The Apps2Digital agents collect application usage data (exe and SaaS) from user devices, and the service automatically classifies the applications and orders the usage data in an intelligible way.

Standardized packaging and delivery of applications

Based on the application catalog and resource consumption data, applications are packaged using an automated and repeatable platform and deployment decisions are made.

Digital wellbeing management

With the knowledge of time spent on productivity tools, collaboration and other business applications at their fingertips, companies can measure and suggest guidelines for digital wellbeing, ensuring that their employees have the toolsand knowledge necessary to maintain their health, and therefore achieve sustainable productivity.
