

Measurable Results.® – **Madison Anesthesiology Consultants**

Hello, my name is Dr. John Olson, I'm the managing partner of Madison Anesthesiology Consultants. We are an independent group that provides all the anesthesia services here at Meriter hospital. We began in 2001 with a group of thirteen anesthesiologists. Today we're a group of 27 board-certified physician anesthesiologists. We provide a full spectrum of anesthesia care for the patients here at Meriter hospital. From the smallest of our patients in the neonatal intensive care unit, across all the adult surgical patients. We also care for a very busy women's health population here at Meriter. We strive not to only maximize their comfort but most importantly, the safety of the expectant mother and their baby. My role as managing partner is to coordinate the business aspects of our group.

SVA provides a number of services for us. Not only do they provide our accounting services, they assist us in our human resource policy review and development. They assist with the credentialing of our new physicians, they work heavily with us and work on the HIPAA compliance of our group. And in this fast-changing electronic world, they've worked extensively with us to develop a secure means to communicate in a compliant manner both within our group and with our other business partners.

One of the things I really enjoy about working with SVA is that I have access to a broad array of very knowledgeable professionals. Having SVA assist us so heavily in the business aspect of our group allows us, myself in particular, to focus on the things we really enjoy and that is taking care of patients.
