Security Monitoring

Username/Password (Credentials) Monitoring

This powerful, proprietary feature helps protect against takeovers of your social, financial and other online accounts by monitoring the internet, dark web and deep web. You'll receive an alert if we find that your username/password combinations have been exposed so you can change your password on that exposed account.

Court Records Monitoring

Detects criminal activity that may be associated with your personal information, sending an alert

when signs of potential criminal identity theft are recognized.

High Risk Credit Account Monitoring

As a member, you have access to continuous credit monitoring through TransUnion. Monitoring can be accessed immediately via the member's service portal dashboard on idshield.cloud or through the free IDShield Plus mobile app. Credit activity will be reported promptly to the member via an email alert and mobile push notification.

Instant Hard Credit Inquiry Alerts

Members will be notified via email and the mobile app when a creditor requests their TransUnion credit file for the purposes of opening a new credit account. Alerts may also be triggered when a creditor requests a credit file for changes that would result in a new financial obligation, such as a new cell phone account, a lease for a new apartment or even an application for a new mortgage. Inquiry alerts can be helpful in determining when an identity thief is opening a new account without your authorization.

Credit Score Tracker

You can view a credit score report from TransUnion that plots your score on a graph, giving you the ability to see how your credit scores have changed over time, along with score factors that provide insight into what events may have caused your credit score to change.

Payday Loan Monitoring

Alerts you when your personal information is associated with short-term, payday or similar cash-advance loans.

Dark Web Surveillance (Internet Monitoring)

Monitors global black-market websites, Internet Relay Chat (IRC), chat rooms, peer-to-peer sharing networks and social feeds or your PII, looking for matches of name, date of birth, Social

Security number, email addresses (up to 10), phone numbers (up to 10), driver's license number, passport number and medical ID numbers (up to 10).

Address Change Verification

Monitors a personal mailing address and sends an alert when a change of address has been requested through the United States Postal Service.

Social Media Monitoring

Monitors multiple social media accounts and content feeds for privacy and reputational risks. You will be alerted to privacy risks like the exposure of PII, including street address, date of birth or Social Security number, as well as reputational risks like foul language, drug and alcohol references, or discriminatory terms.
