

Magoosh

10-Week SAT Study Plan For School Partners

schools.magoosh.com

Dear School Partner

We created this 10-week study schedule to offer you and your students some guidance in making the most of Magoosh SAT. We hope that, out of the box or with a few tweaks to suit your learning environment, this plan will help you to provide your students with a rich and comprehensive SAT study experience while avoiding the overwhelm that can come with the SAT's varied curriculum.

This SAT schedule is more streamlined and structured than the ones we typically suggest for individual students. It is divided into 3 sections spanning a total of 10 weeks, but can easily be extended up to about 12 weeks or trimmed down to 8 weeks as your situation requires. If the pacing is relaxed substantially, this schedule could also be adapted with relatively little effort to cover a 15- to 18-week semester.

This schedule is divided into chunks we call assignments, each of which consists of a lesson playlist and a set of associated practice problems. These assignments range in estimated length from 20 to 80 minutes. In all, we expect the material outlined here to take just over 55 hours to complete, or about 5 ½ hours a week. This is lighter than our traditional self-study schedules but likely far too heavy for students who aren't enrolled in a class or getting class credit.

If you or your students need to **lighten this schedule**, we recommend keeping the Part A assignments intact and retaining 1 of the 2 practice exams. We also encourage students to keep an Error & Reflection log regardless of how many lessons they watch or problems they solve. What can be cut, then? That will depend on your cohort of students, but here are some considerations:

- If your students are consistently strong on their math fundamentals (for instance, if you teach in a science-and-technology-focused school or program), it will make sense to mark some of the arithmetic and algebra topics in Part B as optional.
- If your students are strong readers and writers in English, some of the more elementary writing topics can be marked optional. On the other hand, if your school or program serves a population of English language learners, it will likely be important to hold onto these topics and consider making cuts elsewhere.

If you wish to **extend this schedule** by a week or two, consider adding some of these activities for the gaps between sections:

- Intersperse short research assignments on colleges and college majors.
- Lead discussions or workshops on college applications.
- Devote time to teach general test-taking skills and stress reduction practices.
- Spread out the workload by moving practice exams and Error Log writeups into the gap weeks.
- Have students work in groups to discuss study habits and strategies (not scores!).

Magoosh 10-Week SAT Study Schedule

When your SAT date is in the distant future (three months can seem like forever), it can be tough to stay focused and not get distracted by other more pressing deadlines.

The best way to stay on track and reach your goal is with a study schedule—so voilà! Save the study schedule below on your computer or phone, print it out, tape it to your mirror, check it off—whatever you need to do to keep yourself accountable. You will thank yourself when you ace the test.

How This Study Plan Is Organized

This is a weekly schedule that is designed to give you some flexibility. The SAT is important, but it shouldn't be your entire life. You need time to do other things, and you'll want to decide which days to devote to studying. The ideal schedule is 2–3 times per week. Some of these study slots need to be long enough for your practice exams, which take 3–4 hours each to complete.

One great option would be to set aside 1.5 hours on, say, Tuesday and Thursday, and 4 hours on Saturday. Most weeks, you won't need to use all of that time, but routines can do wonders for peace of mind and focus.

The point is to dedicate specific days to study, so whether that means regular study on Monday, Wednesday, and Friday, or a marathon study session every Sunday, create your SAT study schedule as soon as possible.

Each week, your homework will consist of some combination of the following:

- **Magoosh Lessons:** View our lesson videos to learn strategies and review concepts. If you're completely comfortable with a topic already, you might want to skim through a lesson quickly. Never pass over a required lesson completely, though, because there might be helpful tips and tricks you didn't know.
- **Quizzes:** Short drills follow many of the lesson sets and are designed to help you practice the techniques you just learned.
- **Practice Questions:** Curated lists of practice questions test your conceptual knowledge a little more broadly and cumulatively than the quizzes do.
- **Video Explanations:** Watch the explanation videos for questions that you missed. The most important part of your SAT practice is learning how to identify where and why you make mistakes.
- **Practice Tests:** Twice during this study plan, you will need to set aside 3 to 4 hours to take practice exams. This is massively important for building up your stamina and getting used to the paper-pencil format.
- **Extra Practice and Review:** In the last third of the study plan, you will have seen nearly all of our lessons on the Reading and Writing sections. This means that you will have been exposed to the concepts, but it's still important to keep practicing them. Thus, we'll include some bonus practice sessions in each of these areas to help you stay in shape.

The items in **bold** are part of lesson-and-practice bundles we call assignments. You can think of these as similar to chapters in a traditional textbook. If you are working with an instructor, coach, or tutor, they will likely refer to the assignments by the titles used in your weekly schedule (e.g., "Factoring" or "Comparison Passages").

Jumping Ahead with Lessons

It's always okay to watch lessons earlier than they're scheduled or watch them out of order. You'll also notice that when you finish answering and reviewing a practice question, lesson titles pop up with links to the videos that teach topics related to the question you just answered. If you have time, take the opportunity to watch some! You can always skim the transcript and then decide if it's worth watching all the way through.

Materials

- Magoosh SAT Premium Account
- SAT Student Website
- Notebook with 3 sections:
 - Notes from lessons and videos
 - Error & Reflection Log (described in Week 1)
 - Class notes (if applicable)
- Calculator
- Pencils

Part A: Learn Strategies and Review Fundamentals

We cover a lot of ground during the first 4 weeks of this course. You'll be watching quite a few lessons, but you'll also be jumping into a significant number of practice questions in all four sections.

It's fine to watch lessons on a higher speed, but please discipline yourself to stick with them.

If you are strong on these topics already—especially in math—you may feel that some of this material is “easy” and can be skipped. We advise against it! The lesson videos will not only give you a good conceptual refresher, they will also cover the material in a way that applies specifically to the exam. If you put in the time to review the basics at least once, you will avoid making “rookie” mistakes and will be better able to identify—and fix—your true knowledge gaps.

Assignments for Part A

Reading	3:04	Math	9:06
The Passage	52 min	Intro to SAT Math	26 min
Question Strategies	44 min	Mental Math	40 min
Wrong Answer Types	44 min	Strategic Thinking	64 min
Line Reference	22 min	Elementary Arithmetic	60 min
Key Words	22 min	Decimals and Fractions	63 min
		Fraction Properties	60 min
Writing	4:31	Percents	33 min
English Introduction	30 min	Percent Changes	51 min
Question Strategies	44 min	Ratios	47 min
Sentence Structure 1	46 min	Intro to Algebra	66 min
Sentence Structure 2	40 min	Solving Quadratics	36 min
Word Choice	58 min		
Essay	53 min	Practice Exam – No Essay	3:00

Week 1: Introductory Lessons, Practice Exam

Our goal this week is to get you acquainted with the basics of the SAT. The first module in each section is essentially a “tour” of that section, giving you a sense of what to expect before you jump into your first practice exam. We’ll also be jumpstarting our discussion of thinking mathematically on the SAT, which is a topic many students struggle with. This week, that means taking a look at some mental math tactics that can save you time and improve accuracy. Next week, we’ll talk about math strategy a little more broadly.

Assignments

Reading

- The Passage

Writing

- English Introduction

Math

- Intro to SAT Math
- Mental Math

Error & Reflection Log

- Set up a log to track practice questions or exam questions you struggled with.
- You can read more about how, and why, to use an error log here:
 - [How Do I Make an Error Log? Do I Need One?](#)
 - [Formatting and Organizing Your Error Log](#)

Practice Exam

This week, you will be taking a full-length practice SAT. You have access to full-length practice exams through Magoosh, but your instructor or coach may prefer that you use one of the several official exams available through the College Board website. Be sure to check which exam you will be using, especially if you are using Magoosh SAT as part of a class.

When you take practice exams, try to mimic the conditions of the test as closely as possible: no phone, no music, no internet, and no TV! You need 3 hours of complete solitude for this. For now, you can skip the essay, but you should definitely take a look at the prompt.

Week 2: Writing and Math

For the next several weeks, we'll be doing a little Math and alternating between the two “verbal” sections of the SAT: Writing and Reading. One advantage of going back and forth like this is that you will be able to see both the similarities and the differences between these two sections. Writing and Reading test your language skills in different but overlapping ways, so don't be surprised if you find that working on one section helps you a bit with the other, too!

Assignments

Writing

- Question Strategies
- Sentence Structure 1
- Sentence Structure 2

Math

- Strategic Thinking
- Elementary Arithmetic
- Decimals and Fractions

Optional reading/watching:

- [Ultimate SAT Guessing Tricks](#) (Video Post)
- [SAT Scores: Everything You Need to Know](#)

Practice questions are included in the assignments.
Continue to update your error log.

Week 3: Reading and Math

This week, we'll do for Reading what we've already done for Writing: expand our discussion of the basics and delve into the different question types you can expect to see. On the Math front, we'll ramp up our work on fractions and deal with another potentially tricky set of topics: percents and percent change.

Assignments

Reading

- Question Strategies
- Wrong Answer Types
- Line Reference
- Key Words

Math

- Fraction Properties
- Percents
- Percent Changes

Optional reading/watching:

- [SAT Reading Practice: Everything You Need to Know to Score Big](#)

Practice questions are included in the assignments.
Continue to update your error log.

Week 4: Writing and Math

In this week's assignments, we'll wrap up some unfinished business in Writing and briefly go over the SAT Essay. In Math, we'll launch into some algebra essentials. A lot of algebra and geometry questions will depend on your knowledge of (and comfort level with) arithmetic, so remember that you can always go back and review the arithmetic material from past weeks if you need to.

Assignments

Writing

- Word Choice
- Essay

Math

- Ratios
- Intro to Algebra
- Solving Quadratics

Optional reading/watching:

- [SAT Math Practice: How to Study Smarter and Score Higher](#)

Practice questions are included in the assignments.
Continue to update your error log.

Part B: A Deeper Dive

Now that you know the overall strategies for the SAT and have reviewed the fundamentals, we're going to delve into some of the more technical aspects of each section. In Writing, we'll be looking at punctuation and organization; in Reading, we'll focus on the role played by logical reasoning and vocabulary. Finally, we'll continue working our way up the SAT Math skill tree, focusing on algebra, word problems, and geometry.

Assignments for Part B

Reading		Math	
Inference	1:43 27 min	Factoring	12:31 54 min
Comparison Passages	23 min	Simultaneous Equations	46 min
Vocabulary in Context	26 min	Absolute Value and Inequalities	55 min
Main Purpose Questions	27 min	Introduction to Functions	32 min
		Word Problems	56 min
		Motion and Work	64 min
		Exponents	72 min
		Roots	78 min
		Equations w/ Exponents & Roots	61 min
		Geometry Basics	69 min
		Right Triangles	65 min
		Polygons	52 min
		Circles	47 min

Writing	
Punctuation	2:45 46 min
Topic Development	36 min
Style and Tone	37 min
Organization	46 min

Week 5: Reading and Math

This week, the focus returns to Reading. Having sketched out the basics in Part A, we'll now look at some of the trickier question and passage types. In Math, we'll forge ahead with the algebra needed to confidently answer word problems—a topic covered in even more detail next week.

Assignments

Reading

- Inference
- Comparison Passages
- Vocabulary in Context
- Main Purpose Questions

Math

- Factoring
- Simultaneous Equations
- Absolute Value and Inequalities
- Introduction to Functions
- Word Problems

Optional reading/watching:

- [The SAT Reading Paired Passage](#)
- [SAT Math: Word Problems](#)

Practice questions are included in the assignments.
Continue to update your error log.

Week 6: Writing and Math

This week, we'll cover a few challenging topics in Writing and wrap up our Math word problem coverage. We'll also tackle our last big arithmetic subject—exponents and roots—and then immediately show how it can be applied in algebra questions.

Assignments

- Writing
- Punctuation
- Topic Development

Math

- Motion and Work
- Exponents
- Roots
- Equations w/ Exponents & Roots

Optional reading/watching:

- [SAT Identifying Sentence Errors Practice Questions](#)
- [SAT Identifying Sentence Errors Answers and Explanations](#)

Practice questions are included in the assignments.
Continue to update your error log.

Week 7: Writing and Math

The Writing topics we'll cover this week are a bit different: style, tone, and overall organization are inherently a little more subjective and less rule-bound than, say, where to put a comma. If you find that you strongly prefer (or strongly dislike) these types of questions, take note! On test day, you can use these preferences to decide which problems to tackle when.

Meanwhile, the Math march continues from algebra into geometry. Even if you are fairly comfortable with this material, it may be worth reviewing, since it's much easier to do well on trigonometry problems if you are rock-solid in your understanding of triangle and circle properties.

Assignments

Writing

- Style and Tone
- Organization

Math

- Geometry Basics
- Right Triangles
- Polygons
- Circles

Optional reading/watching:

- [SAT Geometry: Angle Diagram Questions](#)

Practice questions are included in the assignments.
Continue to update your error log.

Part C: Advanced Topics and Review

Now that we're in the last leg of the study plan, we're going to ramp up on the practice problems and scale back just a bit on the weekly lessons. You'll still be learning new SAT content (primarily math), but your main tasks are to review, consolidate, and apply what you've already learned. It's rewarding to see it all come together!

New in this part will be the use of the Custom Practice feature, which you can find by clicking on any of the section names at the top of your screen when logged into Magoosh. If you click "Math," for example, you will get a "Math Practice Questions" menu that lets you pick math subjects to practice, along with difficulty level and number of questions. For now, when you see a section-specific "Custom Practice" item, select "Unanswered" and consider using the default "Adaptive" difficulty setting, which will adjust the difficulty based on your level of performance. As for subjects—it's your choice! Pick the ones you want to brush up on, or hit "Select All" for a comprehensive challenge.

Remember to take care of your physical and mental wellbeing. If you're feeling wiped out, consider rewatching some introductory videos or search through the Magoosh blog for inspiration.

Assignments for Part C

Reading

Custom Practice 2 h

Writing

Custom Practice 2 h

Math

11:03
*3D Geometry 30 min
Geometry Strategies 40 min
Lines in Coordinate Plane 68 min
*Advanced Coordinate Geometry 67 min
Statistics 57 min

Math, cont'd

Data Analysis 44 min
Sets and Sequences 62 min
SOHCAHTOA Trigonometry 47 min
Unit Circle Trigonometry 68 min
Trigonometric Functions 36 min
Complex Numbers 39 min
Specific Functions 27 min
*Advanced Precalculus 42 min
Advanced Strategies 36 min

Practice Exam + Essay 3:50

*Optional item

Week 8: All-Section Review, Advanced Math

At this point, if you've been following the study plan, you have seen all of the basic Reading and Writing content you will be expected to know on the test, and you've learned some strategies for working through each section. As your test date approaches, it's important to keep practicing these strategies at least a little bit each week. Accordingly, this week and next week will focus on practice across all three of these sections. To really challenge yourself in these areas, check out the problem sets under "Optional Reading."

We'll also explore the last few Math topics that you'll need for the exam. These are not as fundamental as the topics covered in Parts A and B of the guide—if you are still struggling with anything from those weeks, it may be wise to review it before (or, time depending, instead of) moving on to these advanced topics. Definitely make sure you have shored up the basics—arithmetic, algebra, and plane geometry—before tackling anything starred as optional.

Assignments

Reading

- Custom Practice (15+ questions)

Writing

- Custom Practice (15+ questions)

Math

- *3D Geometry
- Geometry Strategies
- Lines in Coordinate Plane
- *Advanced Coordinate Geometry
- Statistics

Optional reading/watching:

- [SAT Passport to Advanced Math: Working with Polynomials](#)
- [SAT Passport to Advanced Math: Coordinate Geometry](#)

Practice questions are included in the assignments; optional (but recommended!) assignments are starred. Continue to update your error log.

Week 9: All-Section Review, Advanced Math

Just as with last week, the name of the game for Reading and Writing is “practice and review.” This is your chance to surface any weak areas that you haven’t had a chance to work on until now, and to review any lessons that can help you shore up your knowledge in those areas.

In Math, we are entering the most advanced math material that is covered on the SAT. Again, if you are struggling with any of the Part A / Part B Math topics, those should take precedence.

Assignments

Reading

- Custom Practice (15+ questions)

Writing

- Custom Practice (15+ questions)

Math

- Data Analysis
- Sets and Sequences
- SOHCAHTOA Trigonometry
- Unit Circle Trigonometry
- Trigonometric Functions

Optional reading/watching:

- Video lessons on any topics that show up frequently in your error log.

Continue to update your error log.

Week 10: Last of the Math, Practice Exam

We're in the home stretch! There are two major goals for this week: block aside the time for your second full practice exam, and review the very last of the Math topics you'll likely encounter on test day. If you have additional study time beyond that, use it to do one last run-through of any/Reading/Writing topics that are still giving you trouble.

Assignments

Math

- Complex Numbers
- Specific Functions
- *Advanced Precalculus
- Advanced Strategies

Practice Exam (with Essay)

- This time around, use an official exam from the College Board website. (If you're in a class or program, confirm which exam to use with your instructor or coach.) Remember that Magoosh academic-help specialists are happy to answer questions about official materials.

Optional (but recommended!) assignments are starred.
Continue to update your error log.

The Day Before the Test

Review your notes, your entire error log, and any flashcards you may be working with. Then, make yourself a “cheat sheet” of final reminders to review the morning of the exam. This can include things like “Watch out for parallel sentence structure!” and “The area of a trapezoid is $(\text{base } 1 + \text{base } 2)/2 \times \text{height}$.”

Review last-minute test-day tips once more and pack your bag. Now, put away all your other SAT materials. Move your flashcards, books, and notebooks out of sight. Don't do searches online about the SAT unless you need to print your registration ticket or check the location.

Instead, watch a movie (avoid caffeine), play sports, do art, talk with friends ... you get the idea!

Test Day

It's test day ... which means no last-minute prep!

Do some light exercise, eat a full breakfast consisting of foods your body is used to digesting, and don't make sweeping changes to your caffeine intake. If you normally drink caffeine in the morning, go ahead, but dial it down a notch because you probably have more adrenaline in your system than usual. Give yourself plenty of time to get to the test center.

Don't forget:

- Admissions Ticket
- #2 Pencils (Not Mechanical)
- Calculator
- Jacket or Sweatshirt
- Photo ID
- Drink
- Watch
- Snack

Review your list of last-minute pointers before you go into the testing center so you can walk into the test confident that you have put in three months of hard work and are ready to show it!
