

FOR IMMEDIATE RELEASE

## **Denver Public Schools Again Selects CenterPoint Education Solutions**

### **As a Qualified Professional Development Service Provider**

[CenterPoint Education Solutions](#), a non-profit, mission-driven provider of assessment solutions, curriculum services, and professional learning, has been selected once again by Denver Public Schools as a qualified vendor to support the district with professional development services for the 2021-2022 school year.

CenterPoint will continue to support the district with custom and comprehensive professional learning services focusing on data and assessment literacy training. This training series empowers teachers to select appropriate assessments, accurately interpret data to pinpoint unfinished student learning, and adjust instructional practice to support students at the point and time of need. A clear understanding of assessments and the data they generate will help educators drive student growth and achievement.

“This year, more than ever, it is paramount for schools and districts to quickly identify unfinished learning so it can be addressed,” says Allison Maudlin, Vice President of Growth at CenterPoint. “Our organization is passionate about the success of every student and every teacher. Our data and assessment literacy trainings are one of the many ways we fulfill this larger mission. We are proud to provide this service to Denver Public Schools once again.”

For more information about CenterPoint Education Solutions, contact Allison Maudlin at [amaudlin@cpeducation.org](mailto:amaudlin@cpeducation.org) or visit [centerpointeducation.org](http://centerpointeducation.org).

*CenterPoint is a mission-driven, nonprofit organization dedicated to supporting schools and districts in implementing coherent instructional models consisting of high-quality curriculum, tightly aligned assessments, and professional learning.*
