

Cloud Insider

Giving cloud professionals the market insights they need

Cloud Insider is a SaaS platform for Cloud Architects, Cloud Consultants and Members of the Cloud Center of Excellence. It provides an unparalleled overview of the fast changing cloud market and enables easy cloud solutioning and price forecasting.

Getting a provider-neutral overview of the cloud market is crucial to identify the most suitable cloud solutions for your clients or projects. By analysing the comprehensive product catalog of Cloud Insider you gather unique insights into how the market is evolving and turn this knowledge to your competitive advantage. With Cloud Insider you can compare cloud products or entire solutions with alternatives of other providers or different technology stacks to find the most cost-effective, secure, and compliant way to meet your project requirements.

Key Use-Cases

Explore the Cloud Services Market

Rely on detailed analysis and up-to-date data of cloud service offerings of all hyperscalers. Browse the cloud service catalog by provider, location, certification and underlying technology with filters and identify the right services based on your requirements. This enables you to save costs, increase decision speed and efficiency by having all the necessary cloud services information in one single platform.

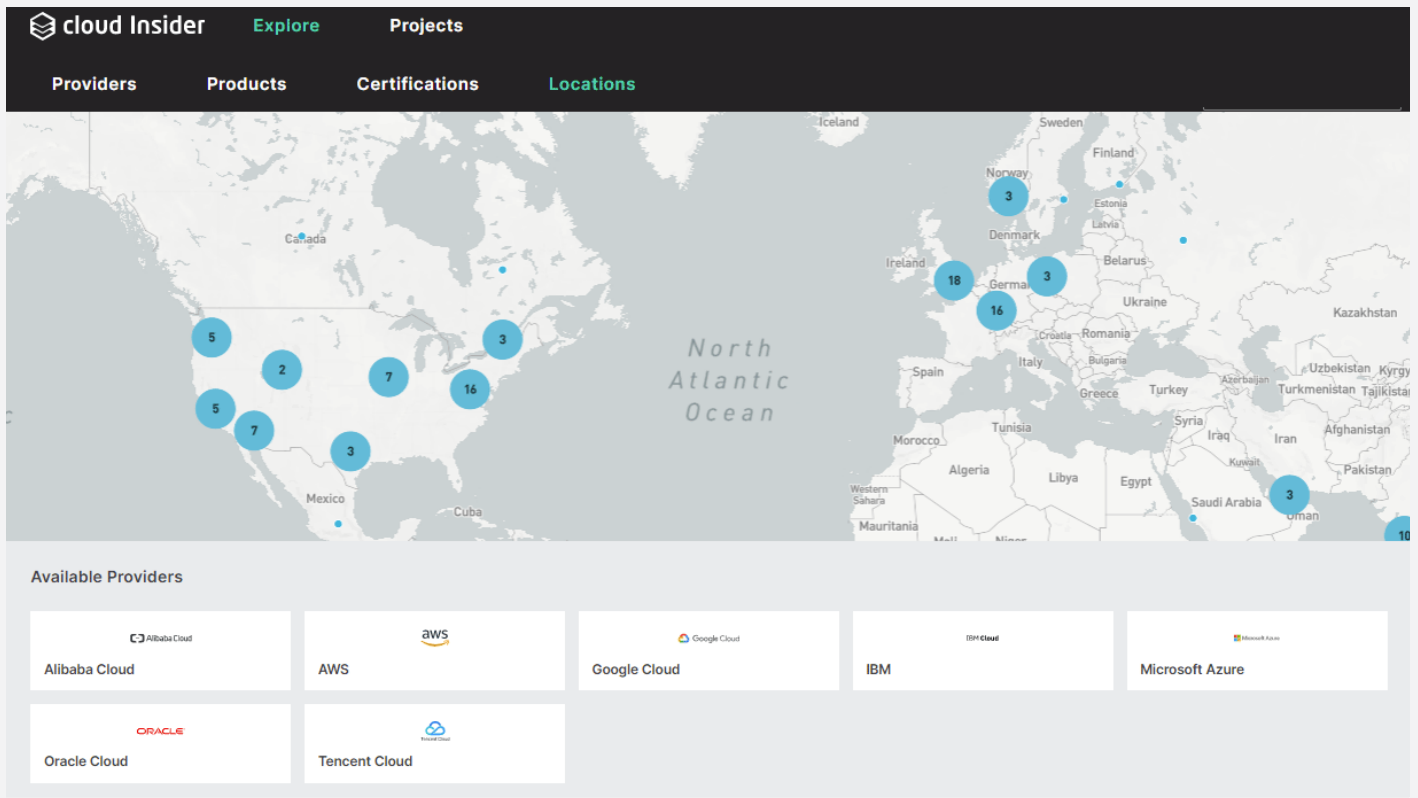

Compare Cloud Services

Select specific cloud services to view available product instances, certification details and compare to similar products of other providers. Easily filter product instances by location, CPU, RAM, OS and compare on-demand against reserved instance prices. This enables your team to make the right cloud solution decisions with speed and confidence.

Build and Compare Cloud Solutions

Create cloud solution designs at the touch of a button and compare different cloud providers or alternative technology stacks to find your best match. Cloud Insider automatically generates bills of materials for your cloud solutions to save time in the planning stage, and to help justify your financial and technical decisions.

“Gain fast access to cloud service market insights, compare prices and provider options and easily plan your cloud solutions.”

About Cloud Insider

Cloud Insider is a product by Txture. Txture also provides a cloud transformation and continuous application portfolio management, modernization, and governance platform for the Cloud Center of Excellence, enterprise architects, and system integrators. Together our software products support you with every step of the cloud transformation process and continuous application portfolio management processes so that your organization can achieve its business goals in a cloud-first world.

“With price comparisons and provider options at your fingertips, you can ensure your cloud solution matches your specific requirements.”

Benefits

-  Vast Cloud Service Catalog
