

NetWorks GROUP

YOUR SECURITY TEAM

NetWorks Group is a Managed Security Services Provider experienced at assessing, designing, managing and monitoring secure networks.

CORPORATE OVERVIEW

We help organizations detect and respond to advanced cyber security threats through a powerful combination of our proprietary threat detection platform, security expertise and security tools. We believe in helping you mature your security posture by advancing your offensive and defensive cyber security capabilities empowered by our world class security operations. The close collaboration between our offensive and defensive service delivery teams has enabled us to help customers stay one step ahead of cyber criminals. This unique approach also helps you reduce cost and increase internal IT efficiency.

Our defensive services leverage big data tools to apply threat intelligence and advanced

analytics to detect security incidents. The ability to actively hunt through logs to identify indicators of compromise has helped us achieve one of the fastest time to detect and lowest false positive rates in the industry.

Our offensive services provide an attacker's view of the environment and mimics the TTP's (tactics, techniques & procedures) of today's hackers. This service provides a practical demonstration of risk across a variety of attack vectors.

Founded in 1997, we have over 20 years of experience delivering security services aligned with your business and compliance needs. Our team is comprised of some of the most experienced, passionate, and security-conscious people in the industry.

SERVICES SUITE

Managed Detection & Response

Detect and respond to cyber security threats by analysis of your network and endpoint data.

Full Scope Penetration Test

Identify the security weakness in your infrastructure by simulating the actions that are taken by a real adversary.

Web Application Security Test

Actively review your website for vulnerability to stay ahead of cyber criminals and adhere to various compliance mandates.

Security Architecture Review

Reduce complexity and improve efficiency of your security deployment via a holistic review of your architecture.

Managed Security Infrastructure

We manage your security infrastructure including Next Generation Firewalls and Intrusion Prevention Systems so that you can focus on your daily tasks.

Vulnerability Management

Gain compliance with PCI DSS vulnerability management requirements and prioritize your remediation approach to vulnerabilities.

PCI Compliance Assessment

As a Qualified Security Assessor Company (QSAC), NetWorks Group can help you achieve PCI compliance through our comprehensive PCI assessment and audit services.
