T1V to feature ThinkHub xCanvas and ThinkHub MultiSite global enterprise collaboration solutions at Enterprise Connect 2019

T1V will be exhibiting at Enterprise Connect 2019 in Booth 1201, where it will showcase its ThinkHub xCanvas and ThinkHub MultiSite technology. These solutions are designed for globally dispersed teams to better support in-room and remote collaboration.

This March 18-20, 2019, T1V will exhibit at [Enterprise Connect at the Gaylord Palms in Orlando Florida](). T1V will showcase its core collaboration solution, ThinkHub, along with a series of add-on modules that further tailor the collaboration solution for specific needs and user outcomes, such as ThinkHub xCanvas, ThinkHub MultiSite, and ThinkHub Agile.

[ThinkHub, T1V's core collaboration solution](), serves as an interactive hub for all of the devices, applications, people, ideas, and content that are commonplace in meetings. Whether you're giving a presentation, running a brainstorming session, or managing a project team, T1V's collaborative software allows you to engage with your peers and cultivate exceptional work in real-time.

For those teams who are looking for an even more immersive presentation and collaboration tool, **ThinkHub xCanvas** extends the ThinkHub experience beyond a single display to multiple displays. ThinkHub xCanvas provides incredible flexibility to teams who are working with large amounts of data and content - giving them the ability to visualize their work on a massive, interactive surface that can be arranged in any configuration of displays.

Using the companion [AirConnect mobile app]() - which is free to all users - participants can connect to the xCanvas, wirelessly share their device screens, and send content (images, videos, PDFs) to the xCanvas to manipulate and analyze with our full set of Canvas annotation tools. Users can control the xCanvas from their AirConnect-powered mobile device, and can connect from any network in the world.

ThinkHub xCanvas participants can use touch gestures to 'toss' content from one display to another, or use AirConnect to control placement of content assets from the convenience of their mobile app. Whether in-room or patching in from a remote location, all participants have access to the same interactive Canvas, with the ability to control and participate as if they are all together in the same room. By leveraging T1V's award winning ThinkHub collaboration technology, ThinkHub xCanvas is high-impact

technology at extremely accessible pricing.

xCanvas also features snap grids, which automatically resize content to display as its largest size and resolution once it has been dragged to the Canvas drop zone. This feature is especially useful for side-to-side content comparisons and deep data analysis. xCanvas displays can be touch or non-touch; non-touch displays will be controlled solely via mobile devices.

Adam Loritsch, T1V EVP of Sales and Marketing, says, "Because ThinkHub xCanvas can integrate with existing display solutions - whether touch or non-touch - it's an easy way to up the functionality of existing meeting rooms. Our deliberate, 'mix and match' approach to ThinkHub add-on modules also means xCanvas teams can also connect with global counterparts via the ThinkHub MultiSite module."

ThinkHub MultiSite provides real-time, room-to-room collaboration for up to 10 office locations at a time. These globally shared sessions can be saved and resumed at anytime, reducing the amount of time required for post-meeting follow-ups and pre-meeting preparation.

Finally, **ThinkHub Agile** introduces a specific set of tools created for lean-agile and design thinking teams and organizations, which includes system of record software integration, so users can import/export ThinkHub Agile sessions with third party software like JIRA and CA Rally. Together with ThinkHub xCanvas and ThinkHub MultiSite, these three add-ons enhance the core ThinkHub collaboration solution while meeting specific requirements of the global organization.

T1V invites you to experience ThinkHub, ThinkHub xCanvas, ThinkHub MultiSite, and ThinkHub Agile at Enterprise Connect, Booth 1201.

About T1V

T1V is a visual collaboration company specializing in multitouch, multiuser software for enterprise and education markets. The company's collaboration platform includes ThinkHub® multitouch collaboration, ViewHub™ wireless presentation, and AirConnect™ mobile app - all working cohesively to support a seamless, intuitive user experience for both in-room and remote participants. T1V's suite of collaboration software represents total meeting room solutions that replace much of the hardware we equate meeting room technology with today.

T1V ThinkHub Connect™ active learning technology is designed to support a variety of teaching and learning styles, from traditional lecture to team problem-solving and group-based work. The solution also supports collaboration between students located at off-site locations and allows easy content sharing between remote locations.

All T1V solutions are Built for BYOD™ (bring your own device) to support the many devices, programs, and platforms of today's meeting and learning environments. T1V is a leading innovator in large-scale, interactive software technology, with four issued patents and two patents allowed in multitouch, multiuser software.
