T1V Announces Unique Active Learning Grant Opportunity for Two Day Experience at Texas A&M University

T1V introduces a new active learning grant opportunity that includes funding for a two-day trip to experience one of the largest active learning technology deployments in the country at Texas A&M University.

T1V is excited to offer a unique active learning grant for leaders in higher education. This grant will provide participants the opportunity to visit the Texas A&M University College of Engineering Zachry Complex in College Station, Texas.

The Texas A&M Zachry Complex is one of the most advanced active learning technology deployments in the country with 18, 100-person learning studios and 14, 50-person learning studios. T1V invites participants to experience the Zachry Complex and interact with the team responsible for this state-of-the-art learning environment.

Participants will meet with Texas A&M IT/Technology decision makers and Instructors, all while touring the facility and observing the classroom technology in action. They'll hear from fellow active learning professionals from around the country, and together - participants will experience and reflect on Texas A&M's classroom technology.

This experience is a \$2,000 value, which will be awarded to your College or University. This funding is intended to cover the following:

- Travel, accommodations, and meals for two people for two days / one night
- Texas A&M College Station campus tour
- Group Dinner with T1V and Texas A&M executives
- Texas A&M Zachry Complex active learning classroom tour + class observation
- Round Table Experience Exchange with Texas A&M classroom Instructors and Instructional Technology staff (best practices, insights, learnings, and more...)
- T1V to publish discussion points from Round Table Experience Exchange for all participants

To apply, please visit t1v.com/edugrant.

Texas A&M University Active Learning Studio featuring ThinkHub Connect technology

About T1V

T1V is a visual collaboration company specializing in multitouch, multiuser software for enterprise and education markets. The company's collaboration platform includes ThinkHub® multitouch collaboration, ViewHub™ wireless presentation, and AirConnect™ mobile app - all working cohesively to support a seamless, intuitive user experience for both in-room and remote participants. T1V's suite of collaboration software represents total meeting room solutions that replace much of the hardware we equate meeting room technology with today.

T1V ThinkHub Connect™ active learning technology is designed to support a variety of teaching and learning styles, from traditional lecture to team problem-solving and group-based work. The solution also supports collaboration between students located at off-site locations and allows easy content sharing between remote locations.

All T1V solutions are Built for BYOD™ (bring your own device) to support the many devices, programs, and platforms of today's meeting and learning environments. T1V is a leading innovator in large-scale, interactive software technology, with four issued patents and two patents allowed in multitouch, multiuser software.
