Yesterday, the first patient was dosed in our Phase 3 trial, marking a very important milestone for argenx and all patients concerned. Thanks to the entire team involved in reaching this, by going the extra mile with us and making sure the IMP was on site in time to make this possible.

In a recent trial we experienced an unforeseen challenge: Our labels had to be reprinted and we were worried that this would push back our delivery to sites by at least 3 weeks. But thanks to Clinigen Clinical Supplies Management and their On-Demand process we were back on track within 48 hours.

We were very impressed with our visit to Clinigen's facility. It's not often that you leave an audit wondering what excuse you can have to come back. Usually you leave with a great deal of hesitation, but not with Clinigen. Your team is awesome!
