

The **leading “as a Service” provider** and the **leading Cloud security OEM** have partnered up to promote the most modern and exciting enterprise video surveillance product on the market today!

Iserv Network as a Service builds a sophisticated IT ecosystem that we manage and support. This highly secure and transparent environment gives your team complete control of the network.

- *Complete visibility with Iserv Network Dashboard*
- *Firewall, switch, or wireless access point management*
- *CapEx or OpEx options*
- *Monthly maintenance plans*
- *24/7/365 U.S. based support*

Verkada Enterprise Security Cameras uses Cloud-based software to transform surveillance with live stream and 90-day video storage. These video systems are simple to deploy, maintain, and scale across multiple sites.

- *No NVR/DVRs*
- *Built with wall-to-wall encryption*
- *30/60/90 days of retained video*
- *Live stream access*
- *No extra plugins or additional hardware required*

---

**With our powers combined, Iserv and Verkada want to offer you managed network and physical security to safeguard your data and people.**

*Start your security enhancement today!*
