

ZERØ® | Operational Excellence, Reimagined

We live in a world where offices are becoming optional—but working from anywhere means more than just location. Today’s legal professionals need true mobility and automation: technology that allows them to generate revenue from wherever they choose to work and maintain productivity, without ever compromising on security.

Meet ZERØ.

ZERØ helps users capture more billable time and be more productive with:

Automatic, passive, and contemporaneous mobile email time capture

Wrong recipient detection in real time

Hyper-accurate predictive mobile email filing

Advanced productivity features and remote work enhancement

Easy-to-use interface on mobile and desktop

Enterprise-grade security

Easy implementation with edge computing architecture

Not only is ZERØ easy to use, but it’s also easy to deploy. ZERØ's edge computing architecture means that its artificial intelligence works on the device itself—no user data is processed outside of the device. This makes ZERØ more secure than other email management solutions, while also enabling ZERØ to integrate easily with your tech stack.

Simply, ZERØ is the only solution on the market that makes the lives of lawyers better while enabling their law firms to generate more revenue.

Visit us at zeroapp.ai/demo to learn more about how ZERØ can help lawyers at your firm generate more revenue and be more productive.
