

Driven to Achieve

Experienced in transforming large organizations through the implementation of quality metrics, test automation, best practices and acquisition/development of high-performance leaders and individual contributors. Driven to achieve an innovative, analytics-oriented and transparent culture that is supported by a mindset of continuous improvement for both the individual and the organization to achieve superior customer value.

Providing High Quality Solutions

TEST AUTOMATION CENTER OF EXCELLENCE

The Vaco Test Automation COE offers consultants with wide ranging skills and experiences, including but not limited to: Selenium, Appium, UFT, LeanFT, Cucumber-JVM, SpecFlow, SilkTest & Slik4J, WebDriverIO, TOSCA, SoapUI.

The COE identifies and implements metrics to show value of automation beyond the typical “time savings” metric, as well as develops an overall test automation strategy that meets your company's unique business needs.

QUALITY ENGINEERING/DEVELOPMENT

Our team of QA consultants brings more than test execution. They are driven to partner with clients to achieve superior results. Some of their capabilities include:

- Conducting test assessments, developing recommendations and implementing solutions to achieve superior results.
- Developing and executing standardized testing processes and metrics.
- Developing and implementing predictive metrics to estimate quality milestone dates, time to release and drive behavior toward improvement.
- Leading testing in multi-vendor environments, onshore, offshore and mixed shore.

METHODOLOGY & APPROACH

Vaco has worked with clients of varying sizes across the globe to deliver outsourced managed services support. We utilize best practices and processes from these engagements, which accelerates the time to value for all engagements.

Collaboratively Establish long and near term test strategies that provide value of cost reduction, effectiveness, and efficiency.

Intentionally Set priorities, develop QA roadmap and implementing cross organizational steering committee to ensure organizational goals are met... not just QA.

Ensure ongoing success through process monitoring, metric-based reporting and continuous improvement.

Purposefully Screen Vaco's Quality Assurance consultants for both client culture fit and technical experience with specific tools and disciplines needed for the client.
