

The right way to attach almost anything to metal roofs!

S-5!®

The Right Way!®

TrapBracket 2.0 & TD Bracket™

The bracket can be used to mount almost anything onto the most common through-fix, trapezoidal roof profiles marketed in Australia today.

No messy sealants to apply! No chance for leaks! These brackets come with a factory-applied EPDM rubber gasket seal already on the base, and the S-5!®-patented reservoir conceals the EPDM from UV exposure, preventing drying and cracks.

Installation is simple! The TrapBracket 2.0 & TD Bracket is mounted directly onto the crown of the panel, straddling the profile. No surface preparation is necessary; simply wipe away excess oil and debris, align, and apply. Secure through the pre-punched holes using the appropriate fasteners or Bulb-tite rivets for the supporting roof material.

These brackets are a perfect match for common solar PV rails and 'L' Feet, or any other ancillary application, without worrying about cold bridging!

TrapBracket 2.0 & TD Bracket are extremely economical and facilitates quick and easy installation. The slotted top hole, which accommodates standard M8 nuts and bolts, simplifies alignment and maximizes flexibility in attaching ancillaries.

TrapBracket™

**TrapBracket 2.0 &
TD Bracket™ is the right
way to attach almost
anything to select
through-fix, trapezoidal
roof profiles, including
PV via common rails.**

TrapBracket™ is the perfect attachment solution for specific Australian trapezoidal, exposed-fix metal roofs! It can be used for almost any attachment need. No messy sealants to apply. The factory-applied EPDM rubber gasket weather-proofs and makes installation easy!

Example Profile

Each TD Bracket & TrapBracket 2.0™ comes with a factoryapplied EPDM rubber gasket on the base. A structural aluminum attachment bracket. The TD Bracket was specifically designed for Lysaght TRIMDEK® and the TrapBracket 2.0 was designed for Kingspan KS1000RW. These two brackets are compatible with two or the more common Australian metal roofing trapezoidal profiles. For design assistance, ask your distributor, or visit www.S-5.com for the independent lab test data that can be used for load-critical designs and applications. Also, please visit our website for more information including AS/NZS 1170.2:2011 spacing arrangements, metallurgical compatibilities and specifications. S-5!® holding strength is unmatched in the industry.

TrapBracket™ 2.0

Designed to fit Kingspan KS1000RW and similar roof profiles

TD Bracket™

Designed to fit LYSAGHT TRIMDEK® and similar roof profiles
