

## **CADfix 12 Data Exchange Fix Change Notes**

Change Notes for CADfix 12 as a brief summary of each fix arranged under their respective Problem report number(s):

	DVAPPS RATMAX only works per line
	Add PLOT/PLUS FLITE
	Model fails to export to PRC
	GUI error selecting 'Materials and Properties' in Model tree
	Invalid flite source radius values imported - need to be trapped on import
15451	PN frog generation: folded facets
15553	Bad C1 frog generation due to NURBS parametric distortion (?)
16472	Entity tree needs to be cleared before opening model
16513	3D connectivity legend
17303	New style C1 triangles need implementing
17436	Wizard prep crashes CADfix
17766	BSIM too dependant on GTOL
17801	Model tree doesn't display nominal (manual) lines
17806	Line.createByInterpolation doesn't support degree 1
	Requested for OOCFI: Line.createByApprox
	ORIENT should be available through OOCFI
17813	CFI/OOCFI should expose SETA XASGD
	Split body by surface not exposed through CFI/OOCFI
	Sweeping of faces into bodies not in CFI/OOCFI
	SSIM REVAXIS needs BODY clause
	SCURVE divapp does not affect small faces, regardless of their curvature
	STURN divapp places division far too densely
	Display of knot multiplicities not working
	Create/edit point on surface fails to pick
	JT-Qualification Daimler
19308	Regression in use of BSIM GROUP
	Incident 7448: mg-hybrid and symmetry planes
	Reading our example Tau mesh file crashes CADfix
	Loading .obj model crashes famfromstl
	Can't identify the parent FROG from a sub FROG
	FRGFIX TOPO corrupts database
	Generate Wireframe frog from BREP lines
	Nodes lost after nodes are merged during MESH MANUAL MATCH
19930	Simpler fillet fails
20040	Prep for export introduces classic twisted NURBS
20041	Prep for export regression
	Basic selection picking phantom facet surfaces
20265	Cannot select a single facet to extract
	Windows 10 flat default GUI colour issue
20460	Self-intersecting loops fix not tidying up
20693	Strange BSIM result
20697	SSIM REVAXIS not including spheres
20724	Anonymous Entities Leaked from BSPL
	Seamless face fix moves toroid axis point far apart
	GUI Error from Mesh manager
	Build move/copy GUI not consistent
	BSIM INDIVIDUAL BOX fails but BSIM GROUP BOX succeeds
	CADFix export to Centaur problem
	FRGFIX INTERSECT throws error
	Syntax issue when identifying APPLE/LEMON torus shapes
	Bad chamfer removal
	WIRE FROG read from FBD corrupts database if NURBS also created
	SUPP does nothing
	NEW RFQ Q7-3404 MHI
	Questionable FROG parent property
	Fillet removal crashes CADfixdev
	Missing Geometry, and a Large ZigZag in extrusion_fillet's MO.
	binary stl export or import broken for dense frogs
21852	2D IGES Manual repair does not find "short edges"
	BATCH CWC operations for saving database not working
	Strange FLITE divapp result in CADfix DEV
	Error 402: Database address is excessive
22139	STURN divapp putting extremely dense divisions on large radius of curvature face

1/11/1/1	Failure to calculate FACPAR when unrelated geometry present in model
	Meshing of wake blocks via MG-HYBRID broken at 11SP1
	Filename being dropped in export to V5
	LSIM not deforming line of vane
	Can't use higher line thickness when domain is in picture list
	Error 402 from EXAMDL in Set Manager Start Up
	Failures in cloud alignment tests
	EDGPAR calculations incorrect for last edge facet after line end point
	Remove restrictions on Copying/Adding/Subtracting frog properties based on property type
24108	CADISON ES BUG - ITF Ticket#2017112310000136
	Provide API equivalents for cexProcess
	Add edge scratches into FACPAR matching and set EDGPAR where poss
	Update the SSIM to take in whole model frogs
	During Auto sourcing the display update is not working
	Changing/moving mixed Solar sets is buggy
	Export deletes last source created
	BOUND of a FROG with EDGPAR REUSE is adding partially matched lines
	LSIM cannot deform closed curves  Material assignment shifts in SP2
	Remove FROGS of less than 2 facets by batch
	Mesh culling clipping plane GUI tool only uses REP 1 rather than REP ALL
	Imported CADfix DWG has strange artefact
	Where CADrix DWG has strange arteract  Where CADrix creates temporary files
	CADfixdev cannot open this .fbm
	Contrasting results on quality use between batch and interactive
	LSIM code need to deal with double(d) points along frog edges
24324	Reworking frglink to deal with edges being created before frgend
	HFM shape cleaning
	ACIS export units wrong
	Multiple assignment in vglEvents.fig
	ALPHA WRAP syntax errors
	Results review - DWG assembly export wrong
	Crash in FROG GENE INV VOID
	Anomalies in FA-EM between cwi and interactive
	Badly oriented inner loop(s) not detected by NFA test FROG_COPY isn't very safe
	What to do about PARAM PROJ
	New symbol for frog property on entity
